Nemeth, 2021-12-28 Homeland Security An Introduction to Principles and Practice Fourth Edition continues its record of providing a fully updated no nonsense textbook to reflect the latest policy operational and program changes to the Department of Homeland Security DHS over the last several years. The blend of theory with practical application instructs students on how to understand the need to reconcile policy and operational philosophy with the real world use of technologies and implementation of practices. The new edition is completely updated to reflect changes to both new challenges and continually changing considerations. This includes facial recognition, intelligence gathering techniques, information sharing, databases, white supremacy, domestic terrorism, and lone wolf actors, border security, and immigration, the use of drones and surveillance technology, cybersecurity, the status of ISIS and Al Qaeda, the increased nuclear threat, COVID 19, ICE, DACA, and immigration policy challenges. Consideration of and the coordinated response to all these and more is housed among a myriad of federal agencies and departments. Features: Provides the latest organizational changes, restructures, and policy developments in DHS. Outlines the role of multi-jurisdictional agencies, this includes stakeholders at all levels of government relative to the various intelligence community law enforcement emergency managers and private sector agencies. Presents a balanced approach to the challenges the federal and state government agencies are faced with in emergency planning and preparedness, countering terrorism and critical infrastructure protection. Includes full regulatory and oversight legislation passed since the last edition, as well as updates on the global terrorism landscape and prominent terrorist incidents, both domestic and international. Highlights emerging oftentimes controversial topics such as the use of drones, border security, and immigration surveillance technologies and pandemic planning and response. Contains extensive pedagogy including learning objectives, sidebar boxes, chapter summaries, end of chapter questions, Web links and references for ease in comprehension. Homeland Security Fourth Edition continues to serve as the comprehensive and authoritative text on homeland security. The book presents the various DHS state and federal agencies and entities within the government, their role, how they operate, their structure, and how they interact with other agencies to protect U.S. domestic interests from various dynamic threats. **Remote Homeland, Recovered Borderland** Shao Dan, 2011-08-31 *Remote Homeland* Recovered Borderland addresses a long-ignored issue in the existing studies of community construction: How does the past failure of an ethnic people to maintain sovereignty over their homeland influence their contemporary reconfigurations of ethnic and national identities? To answer this question, Shao Dan focuses on the Manzus, the second largest non-Han group in contemporary China whose cultural and historical ancestors, the Manchus, ruled China from 1644 to 1912. Based on deep and rigorous empirical research, Shao analyzes the major forces responsible for the transformation of Manchu identity from the ruling group of the Qing empire to the minority of minorities in China today. The de-territorialization and provincialization of Manchuria in the late Qing, the remaking of national borders and ethnic boundaries during the Sino-Japanese contestation over Manchuria, and the power of the state to re-categorize borderland populations and ascribe ethnic identity in post-Qing republican states. Within the first half of the twentieth century, four regimes—the Qing empire under the Manchu royal clan, the Republic of China under the Nationalist Party, Manchukuo under the Japanese Kanto Army, and the People's Republic of China under the Communist Party—each grouped the Manchus into different ethnic and national categories while re-positioning Manchuria itself on their political maps in accordance with their differing definitions of statehood. During periods of state succession, Manchuria was transformed from the Manchu homeland in the Qing dynasty to an East Asian borderland in the early twentieth century before becoming China's territory recovered from the Japanese empire. As the transformation

of territoriality took place the hard boundaries of the Manchu community were reconfigured its ways of self identification reformed and the space for its identity representations redefined Taking the borderland approach Remote Homeland goes beyond the single country focus and looks instead at regional and cross border perspectives It is a study of China but one that transcends traditional historiographies As such it will be of interest to scholars of modern China Japanese empire and Northeast Asian history as well as to those engaged in the study of borderlands ethnic identity nationalism and imperialism
