Temptation To Do Good:

The Temptation to Do Good Peter Ferdinand Drucker,1984-01-01 **Dennett** Tadeusz Zawidzki,2014-10-01 A systematic and thorough interpretation of the philosophy of Daniel Dennett this book is a tantalizing entrance into the philosophy of mind Manifestly we human beings are conscious thinking free and responsible agents However science has revealed that we are also natural products of evolution composed of simple biochemical components which are arranged in complex self maintaining configurations How do these two aspects of humanity coincide Tadeusz Zawidzki outlines Dennett's reconciliation of three major components thought consciousness and freedom of the will with what science tells us about human nature In the course of this exposition the book highlights the important role that Darwinian thinking plays in Dennett's proposed reconciliation as well as his innovative proposals regarding the reality of our consciousness and its attributes An insightful introduction to Dennett's thought this work will prove invaluable to interested readers students and scholars alike
