Four Practical Revolutions in Management Alan

Graham, Shoji Shiba, David Walden, 2001-04-24 In *Four Practical Revolutions in Management Systems for Creating Unique Organizational Capability* authors Shoji Shiba and David Walden significantly revise their classic text on leading management systems. A New American TQM. This book is a comprehensive approach to business management that goes beyond business operations improvement. The authors demonstrate a program for establishing a sophisticated state of the art management system that creates unique organizational capabilities. Containing new methodologies and case studies, the book is one of the most extensive in the management field and provides a step by step program for implementing leading management techniques. To create a successful management system, the authors argue that companies must be organized around four major areas of practice called the four revolutions. They are customer focus, continuous improvement, total participation, and societal networking. For each of the areas, the book presents proven methods that enable dynamic implementation strategies.

Customer Focus Any effective management system begins with the customer. Companies must learn to integrate a customer's concerns into their own. The book presents how to embrace the market in concept and integrate the other skills in the book into a management strategy that focuses on the customer.

Continuous Improvement For a company to be successful in the 21st century, it must continually improve its processes to meet the ever-changing needs of the customer. This book introduces important tools for process discovery, management, and improvement. In the process, it moves beyond reactive improvement methods to proactive improvement efforts.

Total Participation The key to creating a dynamic management system is employee participation. Employees are the ones who work on the issues of quality and customer satisfaction on a daily basis. This book presents skills such as hoshin management, team building, creating structures for mobilization and leading change, and breakthrough.

Societal Networking Besides a company's internal audience, another source of business improvement ideas is societal networking. This is the set of companies, customers, and suppliers associated with any organization that can learn from the experiences of these groups. To develop these valuable resources into a comprehensive management strategy, the book covers mutual learning methods as well as keys for integrating various management methodologies. This book includes Hoshin management, PDCA plan-do-check-act cycle, 7-step method of reactive improvement, Proactive improvement to develop new products, Engaging people in a changing environment, Focused strategies for phase in, Leading process improvement, The practice of breakthrough, Over thirty thorough case studies.

Where Futures Converge Robert Buder, 2022-05-10 The evolution of the most innovative square mile on the planet, the endless cycles of change and reinvention that created today's Kendall Square. Kendall Square in Cambridge, Massachusetts, has been called the most innovative square mile on the planet. It is a life science hub hosting Biogen, Moderna, Pfizer, Takeda, and others. It is a major tech center with Google, Microsoft, IBM, Amazon, Facebook, and Apple all occupying big chunks of pricey office space. Kendall Square also boasts a dense concentration of startups with leading venture capital firms conveniently located nearby. And of course, MIT is just down the block. In *Where Futures Converge*, Robert Buder offers the first detailed account of the unique ecosystem that is Kendall

Square chronicling the endless cycles of change and reinvention that have driven its evolution Buderer who himself has worked in Kendall Square for the past twenty years tells fascinating stories of great innovators and their innovations that stretch back two centuries Before biotech and artificial intelligence there was railroad car innovation the first long distance telephone call the Polaroid camera MIT's once secret now famous Radiation Laboratory and much more Buderer takes readers on a walking tour of the square and talks to dozens of innovators entrepreneurs urban planners historians and others He considers Kendall Square's limitations its gentrification gone rogue by one description with little affordable housing no pharmacy and a scarce middle class and its strengths the human collisions that spur innovation What's next for Kendall Square Buderer speculates about the next big innovative enterprises and outlines lessons for aspiring innovation districts More important he asks how Kendall Square can be both an innovation hub and diversity equity and inclusion hub There's a lot of work still to do
