## Terminal Visions The Literature Of Last Things:

**Terminal Visions** W. Warren Wagar,1982    **Apocalyptic Transformation** Elizabeth K. Rosen,2008-02-15 Since its inception the story of the apocalypse has been used as a means by which to understand the world and one's place in it. The appeal of the apocalyptic myth is largely rooted in its ability to make sense of instances of crisis by incorporating those crises into a larger plan for history and an end of time that God has planned. Apocalypse is both an organizing principle to be imposed on an overwhelming seemingly disordered universe and a fundamentally moral story which offers hope of a new world where good and evil can be clearly delineated and addressed. But all of the traditional functions and comforts of the apocalyptic myth are challenged when the myth collides with postmodernism. The characteristics that define a work as postmodern ultimately destabilize the traits that make the apocalyptic myth unique. Using the work of Terry Gilliam, Don DeLillo, Kurt Vonnegut and other writers in the genre, Apocalyptic Transformation examines the collision of the postmodern mode and the apocalyptic myth, explores the process of secularizing this religious story and the reasons for doing so and asks the question: What happens when an author undermines the grand narrative of the apocalypse?

**A Companion to the Victorian Novel** Patrick Brantlinger, William Thesing,2008-04-15 The Companion to the Victorian Novel provides contextual and critical information about the entire range of British fiction published between 1837 and 1901. Provides contextual and critical information about the entire range of British fiction published during the Victorian period. Explains issues such as Victorian religious class structure and Darwinism to those who are unfamiliar with them. Comprises original accessible chapters written by renowned and emerging scholars in the field of Victorian studies. Ideal for students and researchers seeking up to the minute coverage of contexts and trends or as a starting point for a survey course.

**Anticipations** David Seed,1995-05-01 The essays in this book focus particularly on how early SF engages with such contemporary issues as exploration, the development of science and social planning. Although written by academics, this book is cast in an accessible style avoiding the use of theoretical jargon.

**Gender and Environment in Science Fiction** Bridgitte Barclay, Christy Tidwell,2020-07-07 Gender and Environment in Science Fiction focuses on the variety of ways that gender and nature interact in science fiction films and fictions exploring questions of different realities and posing new ones. Science fiction asks questions to propose other ways of living; it asks what if and that question is the basis for alternative narratives of ourselves and the world we are a part of. What if humans could terraform planets? What if we could create human/nonhuman hybrids? What if artificial intelligence gains consciousness? What if we could realize kinship with other species through heightened empathy or traumatic experiences? What if we imagine a world without oil? The texts analyzed in this book ask these questions and others exploring how humans and nonhumans are connected, how nonhuman biologies can offer diverse ways to think about human sex, gender and sexual orientation and how interpretive strategies can subvert the messages of older films and written texts.
