The German Historical School Of Economics:

The German Historical School Yuichi Shionoya,2000-10-12 With the increasing acceptance of evolutionary and institutional thinking among economists general interest in the German Historical School has risen steadily during the last decade This book traces the development and transformation of the School covering its leading figures such as Adam Muller Wilhelm Roscher Karl Knies and Lujo Brentano The German Historical School and European Economic Thought José Luís Cardoso,Michalis Psalidopoulos,2015-10-30 The financial crisis of 2008 has revived interest in economic scholarship from a historical perspective The most in depth studies of the relationship between economics and history can be found in the work of the so called German Historical School GHS The influence of the GHS in the USA and Britain has been well documented but far less has been written on the rest of Europe This volume studies the interconnection between economic thought and economic policy from the mid nineteenth century to the interwar period It examines how the School s ideas spread and was interpreted in different European countries between 1850 and 1930 analysing its legacies in these countries In doing so the book is able to trace the interconnection between economic thought and economic policy adding new voices to the debate on the diffusion of ideas and flow of knowledge This book identifies issues related to topics such as nationalism and cosmopolitanism in the history of ideas and clarifies themes in policy making that are still currently debated These include monetary policy and benefits of free trade for all parties involved in international exchanges This book will be of a great interest to those who study history of economic thought economic theory and political economy Arthur Spiethoff and the German Historical School of Economics Vitantonio Gioia,2024-04-02 Arthur Spiethoff 1873 1957 an economist of the German Historical School of Economics is best known for his theory of the business cycle Despite Spiethoff calling for a unified reading of his work his epistemological thinking has received less attention This book addresses that gap by analysing Spiethoff s theory of the business cycle in the light of his epistemological views Putting Spiethoff s work in context the book also investigates the most significant features of the evolution of the research programme of the German Historical School of Economics with particular reference to the relationships between Schmoller Sombart Weber and Spiethoff In addition Spiethoff s work is compared with some of the scientific orientations of the current debates on the epistemological side the book examines the relationship between Spiethoff s views and some contemporary thinking on scientific realism as well as methodological pluralism in social sciences And more broadly it emphasises the analytical relevance of the historical approach in explaining the economic imbalances of contemporary capitalism questioning the idea widespread in the neoclassical approach that taking historical specificities into account makes it hard to achieve a theoretically effective attitude This book is a significant addition to the literature on the German Historical School of Economics and the history of economic thought business cycle theory and macroeconomics more broadly The Soul of the German Historical School Yuichi Shionoya,2005-01-24 This volume is a collection of my essays on Gustav von Schmoller 1838 1917 Max Weber 1864

1920 and Joseph Alois Schumpeter 1883 1950 published during the past fifteen years These three intellectual giants are connected with the German Historical School of Economics in different ways In the history of economics the German Historical School has been described as a heterodox group of economic researchers who flourished in the Germ speaking world throughout the nineteenth century The definition of a school is always problematic Even if the core of a certain idea were identified in the continuous and discontinuous process of the filiation and ramification of thought it is still possible to trace its predecessors successors and sympathizers in different directions creating an amorphous entity of a school It is beyond question however that Schmoller was the leader of the younger German Historical School the genuine school with a sociological 1 reality Schmoller was indeed the towering figure of the Historical School at its zenith

The Early History of Economics in the United States

Birsen Filip,2022-10-24 Since the latter half of the 20th century the economics departments of American universities were internationally renowned for providing competitive and advanced levels of education However from the 1870s up until the beginning of WWI German universities held international supremacy when it came to the quality of teaching the enrollment of foreign students and scholarly publications This book examines the role of the German Historical School of Economics GHSE in the development of the discipline of economics in the US during this period The chapters explain that prior to the influence of the GHSE political economy was in a dismal state in the US both as a profession and an academic discipline As a result many Americans elected to go to Germany in pursuit of an advanced education in political economy having been inspired by the unmatched international reputations of theorists of the GHSE After they returned home these German trained Americans challenged the dominant status of classical orthodoxy and revolutionized the discipline of economics in the US by importing the ideas methods and approaches of the GHSE In doing so they established the first dedicated political economy departments graduate programs and chairs at American universities and colleges Although the precise magnitude and value of the influence of the GHSE is impossible to quantify there is no doubt that Americans are deeply indebted to this school of thought for its contributions to the early development of the discipline of economics in the US The chapters also examine what has been lost since the current mainstream in economics has eliminated many of the features that were once so important to the discipline that it has effectively limited contemporary economics to a small fraction of the complex organism defined by the German Historical School This situation has facilitated the poverty of the leading economic school of thought as well as the discipline of economics in general This book represents a significant contribution to the literature on the history of economic thought and economic education in the US It will be of particular interest to students and scholars of economics political science sociology and the philosophy of economics

Criticisms of Classical Political Economy Gilles Campagnolo,2010 The role of the German Historical School and of Carl Menger founder of the Austrian School is appraised in this new book This important period of the history of economics is vital to understand how the discipline developed over the next half century Gilles Campagnolo has produced an impressive

original work which makes use of rarely seen research by Carl Menger and as such this book will be of interest across several disciplines including history of economic thought economic methodology philosophy of science and the history of ideas

The German Historical School of Economics William Burton Cherin, 1933 **The German Historical School and European Economic Thought** José Luís Cardoso, Michalis Psalidopoulos, 2015-10-30 The financial crisis of 2008 has revived interest in economic scholarship from a historical perspective. The most in depth studies of the relationship between economics and history can be found in the work of the so called German Historical School (GHS). The influence of the GHS in the USA and Britain has been well documented but far less has been written on the rest of Europe. This volume studies the interconnection between economic thought and economic policy from the mid nineteenth century to the interwar period. It examines how the School's ideas spread and were interpreted in different European countries between 1850 and 1930 analysing its legacies in these countries. In doing so the book is able to trace the interconnection between economic thought and economic policy adding new voices to the debate on the diffusion of ideas and flow of knowledge. This book identifies issues related to topics such as nationalism and cosmopolitanism in the history of ideas and clarifies themes in policy making that are still currently debated. These include monetary policy and benefits of free trade for all parties involved in international exchanges. This book will be of a great interest to those who study history of economic thought, economic theory and political economy.

Austrian and German Economic Thought Kiichiro Yagi, 2013-03-01 This book intends to renovate the view of social sciences in the German speaking world. It explores the intellectual tension in the social science in Austria and Germany in the late nineteenth and early twentieth centuries. It deals with how the emergence of the new school Austrian School changed the focus of social science in the German speaking world and how it prepared the introduction of an evolutionary perspective in economics, politics and sociology. Based on mostly hitherto unknown primary evidence this development is lively described in a series of encounters and decisions by each social scientists.

The Theory of Ethical Economy in the Historical School Peter Koslowski, 2012-02-02 The Historical School of Economics develops a historical theory of the economy and of business ethics. It investigates the ethical and cultural determinants of economic behaviour and economic institutions and forms an ethical and cultural theory of economics and business and the origin what in the present is called institutional economics. Being one of the first comprehensive studies in the English language of the German Historical and Ethical School of Economics the book presents the theory from Wilhelm Roscher to Gustav Schmoller the foundations of historism and the humanities of Wilhelm Dilthey and their present relevance. It also makes visible which impact the Historical School has for the foundations of contemporary business ethics and the cultural theory of the economy.

The Rise of Historical Economics and Social Reform in Germany, 1864-1894 Erik Grimmer-Solem, 2003 An investigation of the thought activity and influence of the economist and social reformer Schmoller in the era of Bismarck. This study explores Schmoller's immense and lasting impact on the development of the social sciences and welfare state in

Germany *Foundations of Marketing Thought* D.G. Brian Jones, Mark Tadajewski, 2017-12-12 The study and teaching of marketing as a university subject is generally understood to have originated in America during the early 20th century emerging as an applied branch of economics. This book tells a different story describing the influence of the German Historical School on institutional economists and economic historians who pioneered the study of marketing in America and Britain during the late 19th and early 20th centuries. Drawing from archival materials at the University of Wisconsin, Harvard Business School and the University of Birmingham, this book documents the early intellectual genealogy of marketing science and traces the ideas that early American and British economists borrowed from German scholars to study and teach marketing. Early marketing scholars both in America and Britain openly credited the German School and its ideology based on social welfare and distributive justice was a strong motivation for many institutional economists who studied marketing in America predating the modern macro marketing school by many decades. Challenging many traditional beliefs, this book provides an authoritative new narrative of the origins of marketing thought. It will be of great interest to educators, scholars and advanced students with an interest in marketing theory and history and in the history of economic thought.

The Theory of Ethical Economy in the Historical School Peter Koslowski, 2013-10-03 The present volume seeks to inaugurate a new discussion of two schools of historical thought by social scientists, economists and philosophers in the English language. The tradition of the Historical and Ethical School of Economics established by Friedrich List, Wilhelm Roscher and Gustav Schmoller, and the tradition of historicism in the humanities represented by Wilhelm Dilthey are examined not so much for their own historical interest as for their potential systematic contribution to the contemporary debates on business ethics, economics, sociology and philosophy. The book contains the proceedings of the 1994 SEEP Conference on Economics and Ethics held under the title Economics and Ethics in the Historical School of Economics: Achievements and Present Relevance. Part A: The Older Historical School: Schmoller, Dilthey and Others with the financial support of the Fritz Thyssen Stiftung, Cologne at Kloster Marlenrode near Hitdesheim and Hannover, Germany on March 23rd to 27th 1994. The SEEP Conferences on Economics and Ethics are organised annually by the editor and the editorial board of Studies in Economic Ethics and Philosophy. SEEP The 1994 SEEP Conference was the first of two conferences on the Historical School and will be followed by a conference in 1996 on the topic Economics and Ethics in the Historical School of Economics: Achievements and Present Relevance. Part B: Heinrich Rickert, Max Weber, Werner Sombart and Others concerning on the discussion in the 20th century.

Methodology of the Social Sciences, Ethics, and Economics in the Newer Historical School Peter Koslowski, 2012-12-06 The volume at hand gives an exposition of the tradition of the Historical School of Economics and of the Geisteswissenschaften or human sciences, the latter in their development within the Historical School as well as in Neo-Kantianism and the sociology of knowledge. It continues the discussion started in the year 1994 on the Older Historical School of Economics and the 19th century German contribution to an ethical theory of economics with the Newer Historical

School of the 20th century Economists social scientists and philosophers examine the contribution of this tradition and its impact for present theory The schools of thought and their approaches to economics as well as to the cultural and social sciences are examined here not as much for their historical interest as for their potential systematic contribution to the contemporary debates on economic ethics economics sociology and philosophy The volume at hand contains the proceedings of the Fourth Annual SEEP Conference on Economic Ethics and Philosophy in 1996 Economics and Ethics in the Historical School Part B Max Weber Heinrich Rickert Max Scheler Werner Sombart Arthur Spiethoff John Commons Alfred Marshall and Others held at Marienrode Monastery near Hannover Germany on March 27-30th 1996 together with several additional invited papers

The Historicity of Economics Heino H. Nau, Bertram Schefold, 2002-01-01 In this volume continuities and discontinuities between Historical School of Economics and Old Institutional Economics are examined with regard to common research objectives and methods Similarly those between these two economic movements and New Institutional Economics as well as new economic sociology are discussed The following questions functioned as a guideline for the contributing economists sociologists historians and philosophers Can we meaningfully speak of the Historical School of Economics HSE as an economic research program What are the commonalities between the HSE and American old economic institutionalism Does the HSE represent a part of the lost anteroom of New Institutional Economics and new economic sociology How and why should the HSE matter to how we do economic and social theory today

German Economic and Business History in the 19th and 20th Centuries Werner Plumpe, 2016-08-03 German economic history in the industrial age has classically formed an important basis for the study of economic growth and industrialisation more generally This book aims to introduce English language readers to modern German economic history based on a selection of work by one of Germany's leading economic and business historians Werner Plumpe who places particular emphasis on the institutional structure of the economy Plumpe's work demonstrates that the country's economic evolution can only be understood by paying close attention to institutional peculiarities such as the shape of industrial relations and the dynamics of corporate decision making It also emphasises the importance of the interconnectedness of capital and labour in the German coordinated market economy and draws attention to individual events and decisions that may have driven long term economic development but are rarely considered in approaches that deal primarily with macroeconomic growth German Economic and Business History in the 19th and 20th Century shows that Germany's economic history still warrants the application of an institutional view of economic transformation that is slightly different from the more formal perspectives dominant in the UK and the US The book serves as a practical demonstration of a historicist approach to economic history introduced by the German Historical School a century ago which still inspires large parts of German economic historiography
