Ryan, 1993 This paper asserts there exists a dangerous GAP in US strategic intertheater transportation capabilities propounds a model describing the GAP and proposes a solution to the problem Logistics requirements fall into three broad overlapping categories Immediate Mid Term and

Sustainment requirements These categories commence and terminate at different times depending on the theater of operations with Immediate being the most time sensitive and Sustainment the least Using the Gulf War logistics flow as a model the three phase points are shown and their airlift sealift tradeoffs discussed Other logistics support options which figured in the war such as prepositioning and host nation support are discussed and the Kuwaiti Theater of Operations shown to be in many ways a fortuitous theater of operations This serendipitous combination of circumstances contributed greatly to our successful logistics buildup and is unlikely to recur The airship is recommended as a suitable solution to the Mid Term strategic transportation dilemma GAP The fundamentals of airship operation 11 are described its history in both war and peace discussed and some current private and military airship activities mentioned Recent technological breakthroughs in materials technology are discussed and the potential for government sponsored research and development yielding equally great propulsion and cargo capacity dividends explored A discussion of the potential threat environment of the early twenty first century shows the airship properly constructed and used would likely be no more vulnerable than jet air lifters while offering transportation capabilities currently unavailable The airship s advantages as an inter intratheater transporter are so great as to deserve further investigation for addition to the US strategic airlift fleet Feasibility Study of Modern Airships, Phase 1, Volume 1 ,1975 **U.S. Air Services** ,1954 **Dirigible** Joshua Stoff,1985 Describes the building launching missions and final dismantling of a hypothetical rigid airship based on the careers of three Navy dirigibles **Illinois Technograph** ,1931
