Ethical Violence Carlo Bordini, 2023-10-16 Human civilization is founded on ethical principles norms of behaviour that have accumulated over time Perhaps the oldest of ethical principles is the rejection of violence which includes the respect for life and for the physical and psychological integrity of others But in some circumstances violence itself can be regarded as ethical for example when it is used by states claiming to act in self defence In these circumstances the need to defend oneself against an enemy can transform war from an unacceptable act into a necessary socially shared

and morally sanctioned choice And it is when violence becomes ethical that we must begin to fear for our future In the wake of the pandemic we are witnessing the growing prevalence of aggression and emotionality in social and political life We find ourselves living in an increasingly impatient and insecure society which is sceptical of scientific thought and which takes refuge in the irrational The decline of rationality and the growing prevalence of violence are increasingly common features of a society that has lost touch with the great Enlightenment narrative We need argues Bordoni to rediscover the rationality we have lost and recuperate the positive side of technology **A.R.E.
