The Gods That Were:

The Gods Were Astronauts Erich von Däniken, 2023-07-03 Bestselling author Erich von Däniken explores the evidence of ancient visitors treated as gods in religious scripture and mythology His findings shake the foundations of both science and faith Why do nearly all the world's major religions share similar myths and legends Whether it's the Old Testament ancient legends or the creation myths of New Zealand's natives you come across similar stories everywhere Erich von Däniken author of the international bestseller *Chariots of the Gods* believes he knows the answer and it is as wondrous and awe inspiring as it is controversial The winged angels populating the Bible the Koran and other religious texts from cultures the world over were in reality extraterrestrials who visited the Earth in ages long past Who were the gods of ancient lore How can the contradictions in the Bible be explained Why are the pagodas of Myanmar formerly Burma so amazingly similar to space capable rockets Erich von Däniken provides convincing new and surprising interpretations and answers that fundamentally contradict both the teachings of religion and current science His astonishing conclusion The gods were not metaphysical beings that humans created in their imagination but extraterrestrial intelligences that have left their traces all over the Earth He offers persuasive evidence that actual living beings inspired the legends that became the basis for many of our religious traditions

When the Gods were Men Kerry L. Barger, 2018-12-04 If time suddenly stopped and you began to retrace every step in your own life there would no doubt be some things you would want to avoid or change Of course that is impossible or is it We live in an expanding universe where time flows from the past into the future However time flows at different rates even within our galaxy depending upon one's location within it What if our universe is not the only one that exists There may be other universes where time flows from the future to the past What would a world like ours look like in such a universe Life would begin at the end of our lives rather than at the beginning On such a world our planet's history would be speculative at best but our prophetic foresight would be 20/20 The dead would rise out of their graves daily Drowned sailors would come out of the seas and the cremated would emerge like the legendary phoenix out of scattered ashes The resurrection of the dead would be commonplace in such a world What will heaven truly be like Studies of the Gods in Greece at Certain Sanctuaries Recently Excavated Louis Dyer, 1891
