**The Gods Themselves** Isaac Asimov, 2011-05-04 In the twenty second century Earth obtains limitless free energy from a source science little understands an exchange between Earth and a parallel universe using a process devised by the aliens But even free energy has a price The transference process itself will eventually lead to the destruction of the Earth's Sun and of Earth itself Only a few know the terrifying truth an outcast Earth scientist a rebellious alien inhabitant of a dying planet a lunar born human intuitionist who senses the imminent annihilation of the Sun They know the truth but who will listen They have foreseen the cost of abundant energy but who will believe These few beings human and alien hold the key to Earth's survival

**Proclus: On Plato Cratylus** Proclus, 2014-04-22

Proclus commentary on Plato's Cratylus is the only ancient commentary on this work to have survived and is illuminating in two particular respects First it is actually the work of two Neoplatonists The majority of the material is supplied by the Athenian based Proclus c 411-485 AD who is well known for his magisterial commentaries on Plato's Timaeus and Parmenides as well as for a host of other works involving the study of Plato This material we have consists of excerpts from Proclus commentary edited by another figure who appears to be a Platonist working somewhat later in Alexandria Consequently it contains insights into the philosophy of both of the

principal late antique centres of Platonism Athens and Alexandria Secondly the material is divided between the grittier issues of language theory on which it engages freely with other ancient philosophies and theological discussion mostly involved with the etymologies of the names of Greek gods in which Proclus is more concerned to relate his own brand of Platonism to the Orphic and Chaldaean theological systems and also to Homer This English translation accompanied by Brian Duvick's extensive notes explicates all these facets of the ancient text
