TALKING POLITICS

Talking Politics

Talking Politics:

Talking Politics Taylor N. Carlson, Marisa Abrajano, Lisa García Bedolla, 2020 Over five decades of research has made clear that social networks can have an important impact on our political behavior Specifically when we engage in political conversation within these networks we develop connections that increase the likelihood that we will become politically active Yet most studies of political behavior focus on individuals rather than the effects of networks on political behavior Furthermore any studies of networks have by and large been based on White Americans Given what we know about the ways in which neighborhood cultural friend and family networks tend to segregate along ethnic and racial lines the authors of this book argue that we can assume that political networks segregate in much the same way This book draws on quantitative and qualitative analyses of 4000 White American African American Latino and Asian American people to explore inter and intra ethnoracial differences in social network composition size partisanship policy attitudes and homophily in political and civic engagement The book thus makes three key contributions 1 it provides for the first time detailed comparative analysis of how political networks vary across and within ethnoracial groups 2 demonstrates how historical differences in partisanship policy attitudes and engagement are reflected within groups social networks and 3 reveals the impact that networks can have on individuals political and civic engagement

Talking Politics A. W. Sparkes, 2006-06-19 Talking Politics is a philosophical examination of some of the basic concepts of political discourse Its primary focus is on the ordinary on what is said by politicians in newspapers and by people in pubs rather than on the works of political theorists This is a work of but not on political theory Talking Politics is Invaluable as a source of reference for students and contains a detailed index Arranged thematically around topics such as Nation Each entry has copious cross references and suggestions for further reading A W Sparkes is uniquely qualified to write such a book combining some thirty years teaching as a philosopher with wide experience of and a life long fascination with politics His attitude is that of a critical but uncynical observer

Talking Politics William A. Gamson, 1992-08-28 Those who analyze public opinion have long contended that the average citizen is incapable of recounting consistently even the most rudimentary facts about current politics that the little the average person does know is taken strictly from what the media report with no critical reflection and that the consequence is a polity that is ill prepared for democratic governance And yet social movements comprised by and large of average citizens have been a prominent feature of the American political scene throughout American history and have experienced a resurgence William Gamson asks how is it that so many people become active in movements if they are so uninterested and badly informed about issues The conclusion he reaches in this book is a striking refutation of the common wisdom about the public s inability to reason about politics
