Talking From 9 To 5:

Talking from 9 to 5 Deborah Tannen, 1994 Tannen maintains that no one style of speaking is superior She does not tell women to speak like men or men to speak like women Instead she explains a variety of styles with real life examples and urges everyone to be aware of and to learn from other conversational styles and to develop flexibility **Talking from 9 to 5** Deborah Tannen, 1995 Your project went off without a hitch but somebody else got the credit You averted a crisis brilliantly but no one noticed You came to the meeting with a sensational idea but it was ignored until someone else said the same thing HOW CAN YOU GET CREDIT GET AHEAD In her extraordinary international bestseller *You Just Don't Understand* Deborah Tannen transformed forever the way we look at intimate relationships between women and men Now she turns her keen ear and observant eye toward the workplace where the ways in which men and women communicate can determine who gets heard who gets ahead and what gets done An instant classic *Talking From 9 to 5* brilliantly explains women's and men's conversational rituals and the language barriers we unintentionally erect in the business world It is a unique and invaluable guide to recognizing the verbal power games and miscommunications that cause good work to be underappreciated or go unnoticed an essential tool for promoting more positive and productive professional relationships among men and women

3 & 2 Robert W. Gonser, 1988 **The Gender Communication Connection** Teri Kwal Gamble, Michael W. Gamble, 2014-12-18 The authors explore the many ways that gender and communication intersect and affect each other Every chapter encourages a consideration of how gender attitudes and practices past and current influence personal notions of what it means not only to be female and male but feminine and masculine The second edition of this student friendly and accessible text is filled with contemporary examples activities and exercises to help students put theoretical concepts into practice **Better Managers Do Better Business** ORRIE BARAGWANATH, 2013-02-21 For the past thirty years I have been lecturing groups and doing productivity consulting for a number of very different factories businesses and agricultural

enterprises I have identified those factors which make management effective and have categorized the types of managers and the stumbling blocks to effective management by each of the types In discussion with my son who has his masters degree in business management and he asked me to put my experiences and theories on paper and to do it in the same manner I use when give seminars on the subject In my lectures I illustrate the positive factors and the stumbling blocks by giving down to earth examples from my experiences but at the same time illustrating constantly that the principles of effective management are common to all managers at whatever level of management from the MD running an airline to the farmer planting tomatoes or the janitor getting the cleaning lady to sweep the passage or the mother attempting to control her philistines in the supermarket I have given an explanation of where and how adults learn their management skills and have defined the four basic management types which are in my experience most common My categories and definitions of the types are original and play a fundamental role in the effectiveness of participative management They also have an elementary function in building self esteem and pride which is cardinal in assisting all levels of management to motivate subordinates and delegate responsibility Motivation and delegation being the two most common factors where so many managers lack the fundamentals to be great managers of large companies instead of small time operators with many regrets The categories I have defined are easily identifiable African history is littered with the worst types of managers and those of Europe and Latin America stand out like sore thumbs And the reason is that they never learnt how to motivate or delegate properly Autocrats have to be tyrannical and greedy because they do not have the management skills to be admired and venerated in their own rite Their recognition comes from elsewhere It has to be so It is a given All tyrants began as well liked and respected people but end up as psychopaths Accompanying effective management of the individual is the limitation of one s management style in delegation the primary limiting factor in management and the core malady in administration at all levels Effective delegation requires a structured step by step adherence to principles of esteem building checking selection and training Anything less is doomed to failure and ineffectiveness Interpersonal Communication Shelley D.
