Tank Pioneers The:

Toward Combined Arms Warfare Jonathan Mallory House, 1985 **Victory on the Western Front** Michael Senior, 2016-10-30 Marshal Foch the Generalissimo of the Allied Armies during the last stages of the First World War commenting on the victories won during the Hundred Days when the Germans were driven back on the Western Front said Never at any time in history has the British army achieved greater results in attack than in this unbroken offensive The scale speed and success of this offensive have provided historians with fertile ground for interpretation and debate How did the British Expeditionary Force having endured the bitter disappointments and heavy losses at Aubers Ridge Loos the Somme Passchendaele Cambrai and during the German spring offensives of 1918 turn the tide of the war and comprehensively defeat the enemy in the field This is the fascinating question that Michael Senior tackles in this lucid and thought provoking study He considers the reasons for the stunning British victories and examines the factors that underpinned the eventual success of the BEF In particular he shows how tactical and technical developments evolved during the course of the war and merged in a way that gave the British a decisive advantage during the final months of the fighting Innovations in guns and gunnery in shells aircraft and tanks and a massive increase in industrial output played key parts as did the continuous process of adaptation experimentation and invention that went on throughout the war years The result was an army that could take advantage of the unprecedented opportunity presented by the failure of the German spring offensive of 1918 Michael Senior provides a challenging and controversial analysis of the underlying reasons for the success of the BEF It is essential reading for anyone who is keen to learn about the extraordinary development of the British army throughout the war and to understand why and how the Germans were beaten **Geological Survey Professional Paper** , 1949

Quarterly Review of Military Literature , 1941 **Weapons and Warfare** Spencer C. Tucker, 2020-03-26 This work covers major weapons throughout human history beginning with clubs and maces through crossbows swords and gunpowder up to the hypersonic railgun lasers and robotic weapons under development today Weapons and Warfare is designed to provide students with a comprehensive and highly informative overview of weapons and their impact on the course of human history In addition to providing basic factual information this encyclopedia will delve into the greater historical context and significance of each weapon The chronological organization by time period will enable readers to fully understand the evolution of weapons throughout history The work begins with a foreword by a top scholar and a detailed introductory essay by the editor that provides an illuminating historical overview of weapons It then offers entries on more than 650 individual weapons systems Each entry has sources for further reading The weapons are presented alphabetically within six time periods ranging from the prehistoric and ancient periods to the contemporary period Each period has its own introduction that treats the major trends occurring in that era In addition 50 sidebars offer fascinating facts on various weapons Numerous illustrations throughout the text are also included *Review of Current Military Literature* , 1940 *Military*

Review, 1941 *Combined Arms Warfare in the Twentieth Century* Jonathan Mallory House, 2001 For centuries the world has witnessed the development and use of increasingly complex and powerful military systems and technologies In the process the art of war has truly become the art of combined arms warfare in which infantry artillery air support intelligence and other key elements are all coordinated for maximum effect Nowhere has this trend been more visible than in the history of twentieth century warfare Originally published as an essential in house study for U S Army officers during the 1980s this much revised and expanded edition remains the most complete study available on the subject Rewritten with a much wider readership in mind it both retains its enormous practical utility for military professionals and provides a valuable and appealing introduction for scholars and general readers Jonathan House author of the original work brings the story of combined arms up to the present covering among other things Desert Storm the war in Chechnya and the rise of smart weapons and related technologies He traces the evolution of tactics weapons and organization in five major militaries American British German Russian and French over 100 years of warfare Revealing both continuities and contrasts within and between these fighting forces he also provides illuminating glimpses of Israeli and Japanese contributions to combined arms doctrine Expanding his insightful analysis of the world wars and the wars in Korea and Vietnam House also offers much new material focused on the post Vietnam period Throughout he analyzes such issues as command and control problems of highly centralized organizations the development of special operations forces advances in weapons technology including ballistic and anti ballistic missile systems the trade offs involved in using heavy versus light armed forces and the enduring obstacles to effective cooperation between air and land forces His strong critique of the air superiority propaganda that came out of the Gulf War is sure to spark some heated debates Rigorously comparative House s study addresses significant questions about how nations prepare for war learn or don t learn its harsh lessons and adapt to changing times and technologies Unique in the annals of the literature on warfare it will be the standard work on this subject for a long time to come *The Tank Pioneers* Kenneth Macksey, 1981-01-01 *Tanks 1914-1918 the Log-Book of a Pioneer* Albert G. Stern, Lieutenant -Colonel Sir Albert G. Stern, 2004-03 Victory has many fathers but defeat in an orphan is a military motto which is well applied to the development of that war winning 20th century weapon the tank So successful was the tank and so revolutionary its effect on warfare that many among them Winston Churchill have good claims to be its father The author of this book is one of the tank s many parents After offering to give the army an armoured car paid for by himself Stern was commissioned and saw at first hand the development of the landship as it was known Churchill persuaded prime minister Asquith to approve the development of a machine for crushing barbed wire entanglements early in 1915 Manufactured in great secrecy in Lincoln the first tanks were ready for action in September 1916 and were deployed to try and break the deadlock on the Somme Stern s account follows the tank through various bureaucratic and other obstacles from the drawing board to the battlefield As such his book is an indispensable account by an insider of the birth of armoured warfare

Interestingly illustrated with many photographs of early tanks and their pioneers **Journal of the United States Artillery** ,1925 *The Pioneer Mail and Indian Weekly News* ,1923 **The Pioneer Vertical Water-tube Boiler of the World** Hazelton boiler company, New York,1897 **The Roots of Blitzkrieg** James S. Corum,1992 Following Germany's defeat in World War I the Germans signed the Versailles Treaty theoretically agreeing to limit their war powers The Allies envisioned the future German army as a lightly armed border guard and international security force The Germans had other plans **Tanks** ,2007 This illustrated history of tanks and other wheeled and tracked fighting vehicles celebrates the vehicles and the work they have done on the battlefield From early models like pre 1916 Holt and Hornsby tractors to today's self propelled guns and howitzers more than 200 vehicles from the United States and Europe are profiled Featuring full color illustrations and photographs this volume is completely up to date and includes maps and accounts of major tank battles from World War I to the war in Iraq This guide is an essential reference for anyone interested in military history and vehicles
 Engineering News and American Contract Journal ,1895 **The Tanks** Kenneth Macksey,1979 Tank Warfare John Reginald Lester,1943 *Zosen* ,1981 **A Guide to the Battlefields of Europe** David G. Chandler,1965 Encyclopedia of information on more than 200 European battles and sites of warfare since Roman times For contents see Author Catalog
