## Telling Wonders:

**Tacitus' Wonders** James McNamara, Victoria Emma Pagán, 2022-02-10 This volume approaches the broad topic of wonder in the works of Tacitus encompassing paradox the marvellous and the admirable Recent scholarship on these themes in Roman literature has tended to focus on poetic genres with comparatively little attention paid to historiography Tacitus whose own judgments on what is worthy of note have often differed in interesting ways from the preoccupations of his readers is a fascinating focal point for this complementary perspective Scholarship on Tacitus has to date remained largely marked by a divide between the search for veracity as validated by modern historiographical standards and literary approaches and as a result wonders have either been ignored as unfit for an account of history or have been deprived of their force by being interpreted as valid only within the text While the modern ideal of historiographical objectivity tends to result in striving for consistent heuristic and methodological frameworks works as varied as Tacitus Histories Annals and opera minora can hardly be prefaced with a statement of methodology broad enough to escape misrepresenting their diversity In our age of specialization a streamlined methodological framework is a virtue but it should not be assumed that Tacitus had similar priorities and indeed the Histories and Annals deserve to be approached with openness towards the variety of perspectives that a tradition as rich as Latin historiographical prose can include within its scope This collection proposes ways to reconcile the divide between history and historiography by exploring contestable moments in the text that challenge readers to judge and interpret for themselves with individual chapters drawing on a range of interpretive approaches that mirror the wealth of authorial and reader specific responses in play

Herodotus in the Anthropocene Joel Alden Schlosser, 2020-07-15 We are living in the age of the Anthropocene in which human activities are recognized for effecting potentially catastrophic environmental change In this book Joel Alden Schlosser argues that our current state of affairs calls for a creative political response and he finds inspiration in an unexpected source the ancient writings of the Greek historian Herodotus Focusing on the Histories written in the fifth century BCE Schlosser identifies a cluster of concepts that allow us to better grasp the dynamic complexity of a world in flux Schlosser shows that the Histories which chronicle the interactions among the Greek city states and their neighbors that culminated in the Persian Wars illuminate a telling paradox at those times when humans appear capable of exerting more influence than ever before they must also assert collective agency to avoid their own downfall Here success depends on nomoi or the culture customs and laws that organize human communities and make them adaptable through cooperation Nomoi arise through sustained contact between humans and their surroundings and function best when practiced willingly and with the support of strong commitments to the equality of all participants Thus nomoi are the very substance of political agency and ultimately the key to freedom and ecological survival because they guide communities to work together to respond to challenges An ingenious contribution to political theory political philosophy and ecology Herodotus in the Anthropocene reminds us that the best perspective on the present can
