**Brainwashing** David Seed, 2004 An examination of the literary and cinematic representations of brainwashing during the Cold War era CIA operative who was a tireless campaigner against communism it took hold quickly and became a means to articulate fears of totalitarian tendencies in American life David Seed traces the assimilation of the notion of brainwashing into science fiction political commentary and conspiracy narratives of the Cold War era He demonstrates how these works grew out of a context of political and social events and how they express the anxieties of the time The Manchurian Candidate Seed provides new interpretations of writers such as Orwell and Burroughs within the history of psychological manipulation for political purposes using declassified and other documents to contextualise the material he explores the shifting view points of how brainwashing is represented changing from an external threat to American values to an internal threat against individual American liberties by the U S government will welcome this study

**The Biochemistry of Glycoproteins and Proteoglycans** William Lennarz, 2012-12-06 Although glycoproteins and proteoglycans have been a subject of research for many years it is only during the last five or so years that they have aroused the interest of a very broad cross section of investigators in the biological sciences The reason for this expanded interest in these molecules is simple not only are glycoproteins and proteoglycans ubiquitous but many are molecules with well defined and important biological functions The list of molecules that fall into this category grows daily interferon immunoglobulins certain hormones many cell surface receptors and viral coat proteins are but a few examples Thus

investigators with interests as diverse as viral replication cell cell interactions poly isoprenoid synthesis secretory processes hormone responses embryonic development and immunology have become concerned with glycoproteins and proteoglycans The objective of this book is to summarize the current state of knowledge on the biochemistry of these molecules Coverage is by no means encyclopedic rather the thrust is to emphasize the recent advances The first chapter deals primarily with structural work on the oligosaccharide chains of glycoproteins but it will be apparent in it and in the succeeding two chapters on biosynthesis that not only do structural studies aid biosynthetic investigations but that studies on biosynthesis often play a major role in elucidation of structure **Railway Mail Service - Hours of Service.
