## **Terracotta Army:**

**The Terracotta Army** John Man, 2010-10-31 The Terracotta Army is one of the greatest and most famous archaeological discoveries of all time 6 000 life size figures of warriors and horses were interred in the Mausoleum of the First Emperor of China each is individually carved and they are thought to represent real members of the emperor's army This is the remarkable story of their creation the man who ordered them made their rediscovery and their continuing legacy as a pre eminent symbol of Chinese greatness The First Emperor Qin Shi Huang was king of the Chinese state of Qin and the first man to unite China into a single empire He built the first Great Wall and brought a single written script to the whole country He was an inspired and ruthless ruler but one also beset by paranoia and a desire for immortality He is still considered the founding father of the modern state of China On his death in 210 BC he was buried in a giant mausoleum near modern day Xi an Legends of the treasures contained therein still tantalize the imagination today In 1974 local farmers digging a well for water broke through into the burial mound and found the first of the Terracotta warriors Further excavations have revealed the full splendour of the buried army But the majority of the mausoleum is yet to be opened including the burial chamber itself myth tells us that amongst the treasures yet to be uncovered is a vast map of the First Emperor's kingdom with rivers marked with channels of flowing mercury The story of the First Emperor and the Terracotta Army is a fascinating one not least for the discoveries yet to be made

**The Terracotta Army** Charles River Editors, 2017-01-11 Includes pictures Includes ancient accounts of the emperor's reign and description of his tomb Describes how the Terracotta Army was designed and created Includes a bibliography for further reading The terracotta army was a one off creation original in both concept and execution unmentioned in any source no sooner buried than destroyed and forgotten Why so realistic Why this many Why full size Why clay The initial inspiration was the need to duplicate a new force of which the main element was infantry conscripted from the emperor's newly acquired masses of peasants and protected not with custom made armor but with scales of leather and simple standardized weapons It was the combination of archers infantry and charioteers this particular balance between officers and men that had enabled the First Emperor to unify the nation John Man The Terracotta Army China's First Emperor and the Birth of a Nation China has always fascinated outsiders much in the same way that distant light fascinates someone looking down a dark road It is both familiar and mysterious ancient and new and fully understanding it seems to always remain just out of reach From the Great Wall to the ancient teachings of Confucius China's natural and man made wonders have been topics of interest among Westerners since the Middle Ages and the pursuit of trade routes both by land and sea amazing Marco Polo and 19th century British expeditions in similar ways despite the passage of several centuries between them For these reasons it comes as little surprise that people across the world were excited when it was revealed in 1974 that archaeologists had uncovered a new and amazing find an underground army consisting of thousands of clay soldiers still standing at their posts despite being over 2 000 years old In addition to the

remarkable feats of craftsmanship and the almost unimaginable size and scale of the Terracotta Army the sculpted statues seemed to bear testimony of something that modern people could not quite wrap their minds around representing a time when China was born almost 200 years before Christ The hope for many was that this remarkable army could reveal the secrets of China s first emperor Qin Shi Huang a man who united seven warring tribes into one of the most powerful nations on earth Even as research continues 40 years after the initial find some of the facts about the Terracotta Army are staggering It s estimated that the army consists of 8 000 soldiers 130 chariots and hundreds of horses and cavalry all of which were sculpted on a mass scale by various factories but were subsequently molded to feature their own unique appearances separate of one another As if that wasn t enough there are also terracotta sculptures of acrobats servants and musicians and the sculptures were painted though most of the paint has faded away over time This impressive horde of funerary art was buried with Qin Shi Huang to serve him in the afterlife much the same way Egyptian pyramids were constructed for pharaohs While the sculptures comprising the Terracotta Army are impressive as a work of art they have indeed proven to be an invaluable historical source as well Thanks to collections of weapons buried with the sculptures as well as the shapes and sizes of the various military equipment historians can get a sense of what Qin Shi Huang had at his disposal when he fought battles and the Terracotta Army itself is even organized based on military rank allowing historians a chance to understand ancient Chinese military formations The Terracotta Army The History of Ancient China s Famous Terracotta Warriors and Horses chronicles the history of the Chinese emperor who commissioned them and a description of the famous funerary art Along with pictures of important people places and events you will learn about the Terracotta Army like never before

**The Terracotta Warriors** Edward Burman,2018-08-07 A history of the famous Terracotta Army in Xi'an China exploring what we now know about it what remains hidden and the fascinating theories that surround its creation Exciting investigations in northwest China are about to reveal more of the mysteries of the huge mausoleum of the Qin Emperor a portion of which was accidentally discovered in 1974 by farmers who were digging a well The second phase of an international research project began in 2011 and is ongoing More recently still promising new excavations began in Pit 2 with exciting fresh discoveries already announced The Terracotta Warriors seeks to examine one of China's most famous archaeological discoveries in light of these new findings The book begins with the discovery of the terracotta warriors and then tells the history of the Qin Dynasty and as much as is known about the construction of the 3rd century BCE mausoleum based on the work of the historian Sima Qian 145-90 BCE He wrote that the First Emperor was buried with palaces towers officials valuable artifacts and wondrous objects According to this account one hundred flowing rivers were simulated using mercury the ceiling was decorated with heavenly bodies high above the features of the land The new findings and the description of the mausoleum based on the quoted historical accounts suggest that the next discoveries may surpass the size and conception of the original discovery of the terracotta warriors In the second part Edward Burman asks Who built it and how He also questions the role of the terracotta warriors who may be servants and not warriors and

what their function may have been in the afterlife Finally he anticipates the ongoing discoveries and describes teh new methods of excavation and preservation    **The Terracotta Army** John Man,2007 The Terracotta Army is one of the greatest and most famous archaeological discoveries of all time 8 099 life size figures of warriors and horses were interred in the Mausoleum of the First Emperor of China each is individually carved and they are thought to represent real members of the emperor s army This is the remarkable story of their creation the man who ordered them made their rediscovery and their continuing legacy as a pre eminent symbol of Chinese greatness The First Emperor Qin Shi Huang was king of the Chinese state of Qin and the first man to unite China into a single empire He built the first Great Wall and brought a single written script to the whole country He was an inspired and ruthless ruler but one also beset by paranoia and a desire for immortality He is still considered the founding father of the modern state of China On his death in 210 BC he was buried in a giant mausoleum near modern day Xi an Legends of the treasures contained therein still tantalize the imagination today In 1974 local farmers digging a well for water broke through into the burial mound and found the first of the Terracotta warriors Further excavations have revealed the full splendour of the buried army But the majority of the mausoleum is yet to be opened including the burial chamber itself myth tells us that amongst the treasures yet to be uncovered is a vast map of the First Emperor s kingdom with rivers marked with channels of flowing mercury The story of the First Emperor and the Terracotta Army is a fascinating one not least for the discoveries yet to be made    **Ming's Adventure with the**
