**Massive Stars** Space Telescope Science Institute (U.S.). Symposium, Space Telescope Science Institute (U.S.), 2009-11-12 Presents observational and theoretical papers from world experts addressing the important role in astrophysics of massive stars    **On the Formation of the Most Massive Stars in the Galaxy** Roberto J. Galván-Madrid, 2012-06-08 The most massive stars in the galaxy those with more than 15 to 20 solar masses are likely to ionize their surroundings before they reach their final mass How can they accrete in spite of the presence of over pressurized gas This thesis presents results of Submillimeter Array SMA and Very Large Array VLA studies of massive star formation regions in the early stages of ionization as well as an analysis of numerical simulations of the evolution of these young HII regions The results favor a picture in which very massive stars form in accretion flows that are partially ionized and that keep accreting material from their environment    *Massive Stars as Cosmic Engines (IAU S250)* International Astronomical Union. Symposium, 2008-07-17 Reviews our current understanding of the life evolution and death of massive stars for researchers and graduate students    *Evolution of Massive Stars* D. Vanbeveren, W. van Rensbergen, C. de Loore, 2012-12-06 Massive stars occupy an exceptional place in general astrophysics They trigger many if not all of the important processes in galactic evolution whereas due to their intrinsic brightness they offer the only until now possibility to study the stellar content and stellar behaviour in distant galaxies The last say 25 years massive stars have been the subject of numerous meetings discussing the influence of massive stars on population synthesis the number distribution of different types of massive stars the LBV phenomenon WR stars X ray binaries stellar winds in massive stars chemical peculiarities in massive stars supernova explosions of massive stars and the important SN1987A event the influence of massive stars and chemical evolution of galaxies It is clear that without a theory of stellar evolution the study of these topics loses a lot of its significance Massive star evolution therefore got a chance in these meetings but rarely as a prime subject The state of the art the physical processes and the uncertainties in stellar evolution were barely touched Even more the influence of close binaries in all these massive star meetings slowly disappeared the last say 13 years without any scientific justification although a significant fraction of stars occurs in close binaries with periods small enough so that both components will interact during their evolution Denying the binaries or not discussing their influence on results and conclusions makes the latter very uncertain or even completely unreliable    **The Interplay Between Massive Star Formation, the ISM and Galaxy Evolution** D. Kunth, 1996    *Bipolar Molecular Outflows in Massive Star Formation Regions* Deborah S. Shepherd, 1996    **The Sailors' Magazine and Seamen's Friend** , 1881    **Proceedings of the International School of Physics "Enrico Fermi."** , 1966    From Stars to Galaxies Claus Leitherer, Uta Fritze-von Alvensleben, John P. Huchra, 1996    Future Directions in High Resolution Astronomy Jonathan D. Romney, Mark Jonathan Reid, 2005    **S&T Today** , 2005    **Symposium** International Astronomical Union, 1991    **From the Earth to the Moon** Jules Verne, 1889    *Astronomy and Astrophysics* , 2006

Chinese Physics Letters ,2004    *Progress of Theoretical Physics* ,1963    **Horizons** Michael A. Seeds,2002 In this fully updated new Seventh Edition Mike Seeds shows students their place in the universe not just their location but their role as planet dwellers in an evolving universe He also emphasizes how science works as opposed to simply teaching facts about astronomy This enthusiastic author inspires students imagination sense of wonder and excitement about new discoveries At the same time Seeds strives to arm students with a solid understanding of the process of science Crafting a story about astronomy Seeds hopes that students will be able to ask questions of nature and gradually puzzle out the beautiful secrets of the physical world    **Natural History** ,1986    **Communication** ,1999    **Galactic X-ray Sources** Peter W. Sanford,Paul Laskarides,Jane Salton,1982
