have we allowed our environment to reach such a crisis What produced the catastrophic population explosion that so taxes the earth's resources Reg Morrison's search for answers led him to ponder our species astonishing evolutionary success His extraordinary book describes how a spiritual outlook combined with a capacity for rational thought have enabled Homo sapiens to prosper through the millennia It convincingly depicts these traits as part of our genetic makeup and as the likely cause of our ultimate downfall against the inexorable laws of nature The book will change the way readers think about human evolution and the fate of our species Small bands of apes walked erect on the dangerous plains of East Africa several million years ago Morrison marvels that they not only survived but migrated to all corners of the earth and established civilizations To understand this feat he takes us back to a critical moment when these hominids developed language and with it the unique ability to think abstractly He shows how at this same time they began to derive increasing advantage from their growing sense of spirituality He convincingly depicts spirituality as an evolutionary strategy that helped rescue our ancestors from extinction and drive the species toward global dominance Morrison concludes that this genetically productive spirituality which has influenced every aspect of our lives has led us to overpopulate the world and to devastate our own habitats Sobering sometimes chilling consistently fascinating his book offers a startling new view of human adaptation running its natural course
