Adaptation Romain Felli, 2021-07-20 When capitalism doesn't fight climate change but rather tries to make a buck out of it The Great Adaptation tells the story of how scientists governments and corporations have tried to deal with the challenge that climate change poses to capitalism by promoting adaptation to the consequences of climate change rather than combating its causes From the 1970s neoliberal economists and ideologues have used climate change as an argument for creating more flexibility in society that is for promoting more market based solutions to environmental and social questions The book unveils the political economy of this potent movement whereby some powerful actors are thriving in the face of dangerous climate change and may even make a profit out of it Resettling America Gary J. Coates, 2023-06-10 Every movement has its bellweathers the ideas that lead the way and rally its adherents towards a set of shared values and visions Resettling America was one such beacon a publication for its time and ahead of its time Those of us doing the work of sustainability and the transformation of communities feel grateful for Gary's early and prescient contribution that has shaped the thinking of so many around the US and beyond Essential reading for all green warriors Jason F McLennan Chief Sustainability Officer Perkins Will Founder Living Building Challenge Originally published in 1981 and now reissued with a new Preface by Gary J Coates Resettling America was one of the first comprehensive transdisciplinary books on the crisis of sustainability and the implications of that crisis for the re design of buildings towns cities and regions Through essays by Coates which provide a theory of ecological design and case studies written by leading authors and activists of the time the book presents a strategic vision of how it would be possible to create a sustainable and livable society through a process of cooperative community development rooted in a radical re visioning of nature self and society By providing a strategic vision as well offering practical means for creating a sustainable society worth sustaining Resettling America remains more relevant and inspiring than ever to those who face the ecology of crises that now surround us in the 21st Century

Howe, 2017-04-03 This collection pulls together key documents from the scientific and political history of climate change including congressional testimony scientific papers newspaper editorials court cases and

international declarations Far more than just a compendium of source materials the book uses these documents as a way to think about history while at the same time using history as a way to approach the politics of climate change from a new perspective Making Climate Change History provides the necessary background to give readers the opportunity to pose critical questions and create plausible answers to help them understand climate change in its historical context it also illustrates the relevance of history to building effective strategies for dealing with the climatic challenges of the future
