Varun Pratap Singh,Ashwani Kumar,Chandan Swaroop Meena,Gaurav Dwivedi,2024-04-29 The text discusses energy efficient vehicles as an essential element of sustainable transportation. The text highlights the social, economic and environmental benefits associated with energy efficient automobiles which effectively solve the issue of greenhouse gas emissions, improve air quality, boost energy security and promote zero emission. The energy efficient technologies for transportation accessibility and safety of the transport system, environmental footprint, health impact, economic development and social growth are the central theme of the book. It further presents future integrated mobility, energy systems and sustainability indicators. This book examines policies, challenges and the latest developments in the field of sustainable mobility. Discusses the latest advances in the field of energy storage systems, batteries, image processing, obstacle identification and automatic gear trains. Highlights the safety, security and risk management related to sustainable transportation, covering zero emissions and sustainability indicators. Presents electric vehicle grid integration and infrastructure for vehicle charging. Aims to provide an overview of various aspects of EV, HEV, ITS and vehicular network deployment design, encompassing the technological advancements, challenges and opportunities associated with this rapidly evolving field. Understanding the transportation needs and preferences of youth populations in shaping transportation policy and promoting sustainable urban development to design transportation systems that are efficient, equitable and environmentally sustainable. Synergize exploration related to the various properties and functionalities through extensive theoretical and numerical modeling present in the energy sector. This book is primarily written for senior undergraduate, graduate students and academic researchers in fields including mechanical engineering, industrial engineering, automotive engineering, manufacturing engineering and environmental engineering.

The Post-Pandemic World John Erik Meyer,2022-03-15 The Covid 19 pandemic is a repeating biophysical shock yet one for which our current socio-economic structure was not prepared. Climate change, scarcity, depletion of natural resources and the inevitable transition to renewable energy are one-time events. Taken together, they present an existential threat to human society. This book is a guide to navigating these megatrends which confront us now but whose consequences will unfold over decades. By presenting clear options on the path to a renewable energy future, this book gives readers a broad perspective as well as detailed, well-illustrated examples to weigh in making decisions which will secure stability and prosperity for their families, their communities and their nations.
