**Dyes from Plants** Thomas A. Zaroni, Eileen K. Schofield, 1983      **Dyes from American Native Plants** Lynne Richards, Ronald J. Tyrl, 2005 The dyeing of textiles and other materials is a rewarding and delightful way to bring the colors of nature to daily living In this fascinating book the authors have compiled extensive information to bring the techniques plants and lore of natural dyeing within every reader s reach      The Complete book on Natural Dyes & Pigments NIIR Board of Consultants & Engineers, 2005-10-04 Natural dyes are dyes or colorants derived from plants invertebrates or minerals The majority of natural dyes are vegetable dyes from plant sources Dyeing is the process of imparting colors to a textile material Different classes of dyes are used for different types of fiber and at different stages of the textile production process from loose fibers through yarn and cloth to completed garments There are technologies that manufacture the pigments for plastics rubber and cosmetics Therefore dyes and pigments have a vast area of applications and have a huge demand in industry Contrary to popular opinion natural dyes are often neither safer nor more ecologically sound than synthetic dyes They are less permanent more difficult to apply wash out more easily and often involve the use of highly toxic mordant Of course the colour possibilities are far more limited the color of any natural dye may be easily copied by mixing synthetic dyes but many other colors are not easily obtained with natural dyes However some mordant are not very toxic and the idea of natural dyestuffs is aesthetically pleasing Applying natural dyes in your fabric production using enzymes will reduce your production cost and improve control There are various kind of natural dyes quinonoid dyes cyanine dyes azo dyes biflavyonil dyes omochromes anthraquinone coprosma gesus etc The use of natural dyes in cloth making can be seen as a necessary luxury to trigger off a change in habits Dyes which stand out for their beauty and ecological attributes would never be employed on just any material but on noble fabrics such as wool silk linen or cotton made to last more than one season Market value will benefit from consumer preferences for environmentally friendly products which will support consumption of high

performance dyes and organic pigments This book basically deals with the use of carotenoids as food colours  
bianthraquinones and related compounds intermediate degradation products of biflavonyls dyestuffs containing nuclear  
sulphonic and carboxylic acid groups quinonoid dyes cyanine dyes optical whitening agents natural dyes for food stability of  
natural colourants in foods effect of additives pyrimidine pigments the total synthesis of the polyene pigments red pigment  
from geniposidic acid and amino compound effect of acid and amine on the formation of red pigment from geniposidic acid  
effect of the substituted position of amino group and chain length of amino compound etc Due to pollution problems in  
synthetic dyes and pigments industry the whole world is shifting towards the manufacturing of natural dyes and pigments  
The present book contains techniques of producing different natural dyes and pigments which has huge demand in domestic  
as well as in foreign market It is hoped that entrepreneurs technocrats existing units institutional libraries will find this book
