Successful Science and Engineering Teaching Calvin S. Kalman, 2017-10-11 The intent of this book is to describe how a professor can provide a learning environment that assists students in coming to grips with the nature of science and engineering to understand science and engineering concepts and to solve problems in science and engineering courses. The book is based upon articles published in Science Educational Research and which are grounded in educational research both quantitative and qualitative performed by the author over many years

Applications of Social Research Methods to Questions in Information and Library Science Barbara M. Wildemuth, 2016-11-14 The second edition of this innovative textbook illustrates research methods for library and information science, describing the most appropriate approaches to a question and showing you what makes research successful. Written for the serious practicing librarian/researcher and the LIS student, this volume fills the need for a guide focused specifically on information and library science research methods. By critically assessing existing studies from within library and information science, this book helps you acquire a deeper understanding of research methods so you will be able to design more effective studies yourself. Section one considers research questions most often asked in information and library science and explains how they arise from practice or theory. Section two covers a variety of research

designs and the sampling issues associated with them while sections three and four look at methods for collecting and analyzing data. Each chapter introduces a particular research method, points out its relative strengths and weaknesses, and provides a critique of two or more exemplary studies. For this second edition, three new chapters have been added covering mixed methods, visual data collection methods, and social network analysis. The chapters on research diaries and transaction log analysis have been updated, and updated examples are provided in more than a dozen other chapters as well.

International Conference on Education and Management Science (ICEMS2014), 2014-09-24 2014 International Conference on Education and Management Science ICEMS2014 will be held in Beijing China on August 19 20 2014. The main purpose of this conference is to provide a common forum for researchers, scientists, and students from all over the world to present their recent findings, ideas, developments, and application in the border areas of Education and Management Science. It will also report progress and development of methodologies, technologies, planning, and implementation tools and standards in information systems. Education is an internal topic. It is a process of delivering knowledge in a basic meaning. Humans are hard to define the actual definition of education. But it is the key point for our society to step forward. Management science is the discipline that adapts the scientific approach for problem solving to help managers making informed decisions. The goal of management science is to recommend the course of action that is expected to yield the best outcome with what is available.
