Thoroughly updated, each chapter features many new studies and references that reflect recent developments in the field. Learning objectives, bold-faced key terms, practice quizzes, a chapter summary, review questions, and a glossary are included. The volume is intended for undergraduate or graduate courses in psychology of learning, human learning, introduction to learning, learning processes, animal behavior, principles of learning and behavior, conditioning and learning, learning and motivation, experimental analysis of behavior, behaviorism, and behavior analysis.
