Throughout history women have been affected by crime both as victims and as offenders. Yet in the ancient world customary laws were created by men formal laws were written by men and both were interpreted and enforced by men.

, 2003 **The Hittite Demonstratives** Petra Goedegebuure, 2014 In order to mitigate the lack of context inherent to the study of dead languages the author has developed a descriptive model that combines a cognitive approaches to reference b a theory of information structure and c typological studies on demonstratives. With the help of this model the author not only provides for the first time a thorough description of the long known demonstratives ka this and apa that but also identifies a third demonstrative asi that yonder. This identification has led to a reappraisal of the distal semantics of apa apa does not mark remote objects at all but points at objects in the vicinity of the addressee. In short the Hittite demonstratives are not distance but person based. As a third person pronoun apa also expresses emphasis. A detailed analysis within the framework of information structure shows for example that apa in preverbal position marks a referent as the Contrastive Focus of its clause in the dog not the cat chased the horse dog is in Contrastive Focus. Non contrastive focal apa on the other hand always occurs in initial position. The addition of information structure to the grammatical description of Hittite thus provides a better understanding of the meaning effects of word order variation in this SOV language.
