

A detailed botanical illustration of a legume root system, showing a central taproot and numerous lateral roots. The roots are covered with numerous small, rounded nodules, which are characteristic of nitrogen-fixing bacteria. The illustration is rendered in a light brown or tan color against a dark green background.

The Leguminosae A Source Of Characteristics Uses And Nodulation:

The Leguminosae, a Source Book of Characteristics, Uses, and Nodulation Oscar Nelson Allen, Ethel K. Allen, 1981
The volume contains a comprehensive taxonomic account of the family Leguminosae as a framework for the author's census report of the nodulating and non nodulating genera and species. The main body of the work consists of synopses of 750 leguminous genera arranged alphabetically. Each is described taxonomically within its proper tribe and subfamily in accordance with accepted classification systems. All of the nodulation data from the survey are further summarized in tabular alphabetical listings of genera under each of the three subfamily categories. *Canadian Journal of Botany*, 2003

It began in 1987 as a joint effort of the Missouri Botanical Garden and the Missouri Department of Conservation. One of its main goals is a three volume revision of former Missouri Botanical Garden curator Julian A. Steiermark's Flora of Missouri first published in 1963. Missouri's ever changing plant diversity, the shifting distributions of its plant species and the many new records of plants in the state have necessitated an expansion of Steiermark's original publication into three volumes. **Bothalia**, 1988 **Biodiversity for Sustainable Development** Pravin Chandra Trivedi, 2007 Biodiversity is one of the major global resources. No part of the planet escapes the effects of human activity which affects diversity either directly or indirectly. The present book Biodiversity for Sustainable Development includes 21 chapters on the topics which are contributing towards this goal. Chapters related to biodiversity include exploration, utilization, conservation and management of non-timber forest resources. Biodiversity: the impact of biotechnology.
