Touching Parchment: How Medieval Users Rubbed, Handled, and Kissed Their Manuscripts Kathryn M. Rudy,2023-04-18 The Medieval book both religious and secular was regarded as a most precious item The traces of its use through touching and handling during different rituals such as oath taking is the subject of Kathryn Rudy s research in Touching Parchment Rudy presents numerous and fascinating case studies that relate to the evidence of use and damage through touching and or kissing She also puts each study within a category of different ways of handling books mainly liturgical legal or choral practice and in turn connects each practice to the horizontal or vertical behavioural patterns of users within a public or private environment With her keen eye for observation in being able to identify various characteristics of inadvertent and targeted ware the author adds a new dimension to the Medieval book She gives the reader the opportunity to reflect on the social anthropological and historical value of the use of the book by sharpening our senses to the way users handled books in different situations Rudy has amassed an incredible amount of material for this research and the way in which she presents each manuscript conveys an approach that scholars on Medieval history and book materiality

should keep in mind when carrying out their own research What perhaps is most striking in her articulate text is how she expresses that the touching of books was not without emotion and the accumulated effects of these emotions are worthy of preservation study and further reflection **The Utrecht Psalter in Medieval Art**,2024-07-29 With authorative

Mapping Time and Space

Evelyn Edson,1999 Until recently medieval maps were often looked upon as quaint amusing and quite simply wrong By comparison the best examples of modern cartography appear to offer a much more accurate record of the world However as Professor Edson makes clear in this stimulating book when seeking the meaning and purpose of maps in the Middle Ages one cannot assume that they were used for the same purposes or had the same meaning as they do today In fact the differences in structure and content give us an intriguing insight into how medieval mapmakers and readers saw their world By a close study of the context in which the mapmakers produced their work it can be shown that they were often striving to present and make sense of a world picture that naturally incorporated key events from the past at the same time showing a narrative of human spiritual development from the Creation to the Last Judgment From publisher's description **Who's who in the History of Cartography** Mary Alice Lowenthal,1992
