The Likelihood Of Coups:

The Likelihood of Coups Rosemary H. T. O'Kane, 1987 Political Fragility: Coups D'État and Their Drivers Aliona Cebotari, Enrique Chueca-Montuenga, Yoro Diallo, Yunsheng Ma, Ms. Rima A Turk, Weining Xin, Harold Zavarce, 2024-02-16 The paper explores the drivers of political fragility by focusing on coups d'état as symptomatic of such fragility. It uses event studies to identify factors that exhibit significantly different dynamics in the run-up to coups and machine learning to identify these stressors and more structural determinants of fragility as well as their nonlinear interactions that create an environment propitious to coups. The paper finds that the destabilization of a country's economic, political, or security environment such as low growth, high inflation, weak external positions, political instability, and conflict set the stage for a higher likelihood of coups, with overlapping stressors amplifying each other. These stressors are more likely to lead to breakdowns in political systems when demographic pressures and underlying structural weaknesses, especially poverty, exclusion, and weak governance are present, or when policies are weaker through complex interactions. Conversely, strengthened fundamentals and macropolicies have higher returns in structurally fragile environments in terms of staving off political breakdowns, suggesting that continued engagement by multilateral institutions and donors in fragile situations is likely to yield particularly high dividends. The model performs well in predicting coups out of sample, having predicted a high probability of most 2020-23 coups, including in the Sahel region. *Regional Organizations and Their Responses to Coups* Franziska Hohlstein, 2022-09-30 Using a mixed methods approach, this book examines the role played by regional organisations (ROs) following the occurrence of a coup d'état. 21st Century Political Science: A Reference Handbook John T. Ishiyama, Marijke Breuning, 2011 Offering full coverage of major subthemes and subfields within political science, this reference handbook includes entries on topics from theory and methodology to international relations and institutions.

Military Coups in Sub-Saharan Africa Staffan Wiking, 1983 This book is a comparative study of military coups between 1958 and 1980 in Africa south of the Sahara. It also provides background information on the causes of some refugee exoduses, for example from Zaire, Sudan, Burundi, Rwanda, and Uganda. There are three parts. The first deals with different theories concerning coups d'état on a general level. The second part is an empirical review concentrating on the justifications given by military leaders immediately after their interventions. The third part analyses the attempts by the military to explain their involvement in politics. The author concludes that military coups rarely take place during periods of social unrest and that the military are very sensitive to civilian intrusion into what they regard as primarily military business. **Letters on the coup d'état of 1851. David, 1985-04-23 Since World War II the U S has struggled with the problem of how to help friendly Third World regimes survive and cope with insurgencies rebellions and invasions with decidedly mixed results This monograph examines how the United States can and should respond to coups d etat occurring in the Third World Co published by arrangement with the Harvard Center for International Affairs *The Coup* Bruce W. Farcau, 1994-04-30 This book provides a paradigm of the coup and provides a historical basis for that paradigm that is unsurpassed in its objectivity and research The author of this book has spent over a decade living and working with military and political figures throughout Latin America His book is both an educational and an exciting peek into the dark world of military subversion by an observer who has seen it first hand The coup d etat has defied all attempts at rational analysis This is hardly surprising in that it is born in darkness and very frequently dies there only coming to light in the last moments before either a bloody defeat or a stunning success The participants on the military side are frequently reluctant to discuss their activities even long after the fact and their civilian victims can usually only guess at what happened to them Previous studies have often been heavily tainted by the politics of the writer categorizing the coup as a product of class struggle the cold war or outright foreign intervention by the superpowers The author of this book has spent over a decade living and working closely with military and political figures throughout Latin America and has used the fruits of literally hundreds of encounters ranging from simple interviews to longtime friendships to piece together an insightful picture of this nebulous but very real phenomenon He has identified the motives of coup plotters and the means by which they go about building the coalition necessary to overthrow a government Rather than use hypothetical cases to illustrate his points he has drawn on history to demonstrate how coups succeed and why they fail This book is both an educational and an exciting peek into the dark world of military subversion by an observer who has seen it first hand An Empirical Study of the Causes of Military Coups and the Consequences of Military Rule in the Third World Wichai Kanchanasuwon, 1989 *The Political Economy of Growth* Alberto Alesina, Roberto Perotti, 1992 **Explorations Toward an Economic Theory of Political Systems** Ramón J Cao-garcía, 1983-05-13 **The 1964 Army Mutinies and the Making of Modern East Africa** Timothy Parsons, 2003-03-30 This book provides a new concept framework for understanding the factors that lead soldiers to challenge civil authority in developing nations By exploring the causes and effects of the 1964 East African army mutinies it provides novel insights into the nature of institutional violence aggression and military unrest in former colonial societies The study integrates history and the social sciences by using detailed empirical data on the soldiers protests in Tanganyika Uganda and Kenya The roots of the 1964 army mutinies in Tanganyika Uganda and Kenya were firmly rooted in the colonial

past when economic and strategic necessity forced the former British territorial governments to rely on Africans for defense and internal security. As the only group in colonial society with access to weapons and military training, the African soldiery was a potential threat to the security of British rule. Colonial authorities maintained control over African soldiers by balancing the significant rewards of military service with social isolation, harsh discipline, and close political surveillance. After independence, civilian pay levels outpaced army wages, thereby tarnishing the prestige of military service. As compensation, veteran African soldiers expected commissions and improved terms of service when the new governments Africanized the civil service. They grew increasingly upset when African politicians proved unwilling and unable to meet their demands. Yet the creation of new democratic societies removed most of the restrictive regulations that had disciplined colonial African soldiers. Lacking the financial resources and military expertise to create new armies, the independent African governments had to retain the basic structure and character of the inherited armies. Soldiers in Tanganyika, Uganda, and Kenya mutinied in rapid succession during the last week of January 1964 because their governments could no longer maintain the delicate balance of coercion and concessions that had kept the colonial soldiery in check. The East African mutinies demonstrate that the propensity of an African army to challenge civil authority was directly tied to its degree of integration into postcolonial society. **Economics & Politics**, 2000 Annual Review of Sociology, 1994 **Journal of Peace Research**, 2010-07

Political Conflict, Political Development, and Public Policy Eduard A. Ziegenhagen, 1994. The transformation of political systems is explored in this edited collection by assessing the relationships among political conflict, political development, and public policy. The continuous collapse and regeneration of political systems accompanied by violence and destruction are experiences shared by a majority of the world's population. Most often, this larger phenomenon is conceived of in terms of political conflict, repression, and political development. This volume is devoted to exploration of this behavior as a means of understanding system transformation. The Spectator, 1889
