## KEY PRINCIPLES

- **Just law:** The law must be open & clear, publicized, and applied evenly.
- **Open government:** The processes of creating & enforcing laws should be accessible & fair.
- **Accessible & impartial justice:** justice should be delivered timely by competent judges.

## EXAMPLES

- **Traffic Laws:** On an everyday level, the enforcement of traffic laws is a simple, yet significant demonstration of the rule of law.
- **Tax Enforcement:** Enforcing payment of taxes ensures the rule of law is respected by all.
- **Environmental Protection:** Laws protecting the environment should be enforced evenly across society in a society governed by the rule of law.

Terrorism, the Laws of War, and the Constitution Peter Berkowitz, 2005-06 Terrorism the Laws of War and the Constitution examines three enemy combatant cases that represent the leading edge of US efforts to devise legal rules consistent with American constitutional principles for waging the global war on terror The distinguished contributors analyze the crucial questions these cases raise about the balance between national security and civil liberties in wartime and call for a reexamination of the complex connections between the Constitution and international law A History of the Laws of War: Volume 2 Alexander Gillespie, 2011-10-07 This unique new work of reference traces the origins of the modern laws of warfare from the earliest times to the present day Relying on written records from as far back as 2400 BCE and using sources ranging from the Bible to Security Council Resolutions the author pieces together the history of a subject which is almost as old as civilisation itself The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and ascribing rules to them protecting civilians who are either inadvertently or intentionally caught up between them and controlling the use of particular classes of weapons that may be used in times of conflict Thus it is that this work is divided into three substantial parts Volume 1 on the laws affecting combatants and captives Volume 2 on civilians and Volume 3 on the law of arms control This second book on civilians examines four different topics The first topic deals with the targeting of civilians in times of war This discussion is one which has been largely governed by the developments of technologies which have allowed projectiles to be discharged over ever greater areas and attempts to prevent their indiscriminate utilisation have struggled to keep pace The second topic concerns the destruction of the natural environment with particular regard to the utilisation of starvation as a method of warfare and unlike the first topic this one has rarely changed over thousands of years although contemporary practices are beginning to represent a clear break from tradition The third topic is concerned with the long standing problems of civilians under the occupation of opposing military forces where the practices of genocide collective punishments and or reprisals and rape have occurred The final topic in this volume is about the theft or destruction of the property of the enemy in terms of either pillage or the intentional devastation of the cultural property of the opposition As a work of reference this set of three books is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself New
