As a guide for students and practitioners it has proven to be unrivalled. The work is divided into three volumes each of which can be used independently or as part of the complete work. Volume 1 in the first chapter covers the roots and foundations of private law, the different origins, structure and orientation of civil and common law, the forces behind the emergence of a new transnational commercial and financial legal order, its meaning, concepts and operation, the theoretical basis of the transnationalisation of the law in the professional sphere, in that order, its methodology and the autonomous sources of the new law, merchant or modern *lex mercatoria*, its international finance driven impulses and its relationship to domestic and transnational public policy and public order requirements. The second chapter covers the transnationalisation of dispute resolution in that order, especially international arbitration, and contains a critical analysis of the main challenges to its success, continuing credibility and effectiveness. All three volumes may be purchased separately or as part of a single set.
