Legal Tales François Ost, 2025-12-18 Telling stories as a way of exploring the law this is the premise of the present volume It draws on a wide range of narrative forms historical fables and animal allegories science fiction and realist reportage dreamlike speculations and fantastical tales philosophical reflections and dystopian visions Across nine stories the book invites readers to reflect on law and justice by posing strange and unsettling questions Should there be laws aboard Noah's Ark Between absolute love and unleashed violence what place is there for Pilate's Roman justice in the trial of Jesus What do the animal trials held in the West up to the French Revolution reveal What if Robinson Crusoe having set sail from Brazil in search of African slaves for his plantations had not been shipwrecked on the outward journey but on the way back Where do the hidden passages of the majestic Palace of Justice lead And what kind of justice lies buried in its secret depths What is law for The story of the Amoco Cadiz shipwreck offers a stark and contrasting answer Can reality sometimes surpass fiction The distortion of law in a modern democracy suggests it can A dystopia emerges when enthralled by their president Selfidor and his motto Never two without me the people begin to forget the law Killing your own clone one equipped with artificial intelligence no less is it murder or the destruction of a non human entity Over the years the author loses touch with his beloved library Books disappear others turn up in the strangest places What is The Liberated Library trying to tell him And what kind of legal knowledge does it contain This book was originally published by Dalloz under the title *Contes de la rue Soufflot* 2024

Fables of the Law Daniela Carpi, Marett Leiboff, 2016-10-24 The latest development

concerning the metaphorical use of the fairy tale is the legal perspective The law had and has recourse to fairy tales in order to speak of the nomos and its subversion of the politically correct and of the various means that have been used to enforce the law Fairy tales are a fundamental tool to examine legal procedures and structures in their many failings and errors Therefore we have privileged the term fables of the law just to stress the ethical perspective they are moral parables that often speak of justice miscarried and justice sought Law and jurists are creators of fables on the view that law is born out of the facts ex facto ius oritur so that there is a need for narrative coherence both on the level of the case and the level of legislation or turned the other way around what does it mean if no such coherence is found This is especially of interest given the influx of all kinds of new technologies that are fabulous in themselves and hard to incorporate in traditional doctrinal schemes and thus in the construction of a new reality
