Snape,2015-03-02 The complete text of the 2015 California Vehicle Code It also includes a list of violations of the code Cost/benefit Analysis of Electronic License Plates Andrew Eberline,2008 The objective of this report is to determine whether electronic vehicle recognition systems EVR or automatic license plate recognition systems ALPR would be beneficial to the Arizona Department of Transportation AzDOT EVR uses radio frequency identification technology tags RFID that would be placed on all registered vehicles so that RFID readers could read vehicles plate numbers as they pass using the radio frequency signal emitted by the RFID tag ALPR technology uses cameras and alphanumerical recognition software to read license plates as they pass The literature review looks into the previous applications of both ALPR and EVR Departments of Transportation DOTs tolling authorities and law enforcement all have used various applications of this advanced electronic technology Based on the literature review and the benefits section Chapter 3 the potential benefits of an ALPR EVR system are 1 The ability for AzDOT to potentially monitor traffic flow more accurately 2 The ability to better enforce license and registration compliance 3 The ability to better enforce auto insurance compliance 4 The ability to implement a toll or congestion charge 5 The ability to aid law enforcement in finding suspected criminals Chapter 4 determines the potential costs of an ALPR or EVR system and then compares the costs with the total quantifiable benefits using two case studies In the first case study an ALPR system was set up on all major valley freeways and in the second case study an EVR system was set up on all major valley freeways The ALPR case study concluded that such an ALPR system could be set up for about 10 million dollars and it could generate up to 400 million dollars in direct benefit per year and up to 1 3 trillion in benefits to highway users per year The EVR case study concluded that such an EVR system could be set up for about 50 million and it could generate up to 407 million in direct benefit per year and up to 1 33 trillion in benefits to highway users per year A direct benefit profits the state directly with cash while benefits to highway users helps society as a whole but the state receives no revenue Chapter 5 looked into the legality of a potential ALPR or EVR system This chapter

concluded that AzDOT has the authority to implement an ALPR EVR system in Arizona However this section also concluded that AzDOT should seek legislative support to increase public support This report concludes that at the present ALPR should be further researched and or implemented by the State of Arizona The reasons for this recommendation are because of ALPR s previous applications ALPR s lower up front cost ALPR s ability to read out of state plates ALPR s potential lower degree of public opposition and the possibility that ALPR would have to back up an EVR system All in all these technologies are changing at a rapid rate and a change in any of these variables that generated this recommendation could change this recommendation
