Star Tales:

Star Stories Anthony Aveni, 2019-10-22 Follow an epic animal race a quest for a disembodied hand and an emu egg hunt in constellation stories from diverse cultures We can see love betrayal and friendship in the heavens if we know where to look A world expert on cultural understandings of cosmology Anthony Aveni provides an unconventional atlas of the night sky introducing readers to tales beloved for generations The constellations included are not only your typical Greek and Roman myths but star patterns conceived by a host of cultures non Western and indigenous ancient and contemporary The sky has long served as a template for telling stories about the meaning of life People have looked for likenesses between the domains of heaven and earth to help marry the unfamiliar above to the quotidian below Perfect reading for all sky watchers and storytellers this book is an essential complement to Western mythologies showing how the confluence of the natural world and culture of heavenly observers can produce a variety of tales about the shapes in the sky

The Power of Stars Bryan E. Penprase, 2017-05-05 Completely revised and updated this new edition provides a readable beautifully illustrated journey through world cultures and the vibrant array of sky mythology creation stories models of the universe temples and skyscrapers that each culture has created to celebrate and respond to the power of the night sky Sections on the archaeoastronomy of South Asia and South East Asia have been expanded with original photography and new research on temple alignments in Southern India and new material describing the astronomical practices of Indonesia Malaysia and other Southeast Asian countries Beautiful photographs of temples in India and Asia have been added as well as new diagrams explaining the alignment of these structures and the astronomical underpinnings of temples within the Pallava and Chola cultures From new fieldwork in the Four Corners region of North America Dr Penprase has included accounts of Pueblo skywatching and photographs of ceremonial kivas that help elucidate the rich astronomical knowledge of the Pueblo people The popular Archaeoastronomy of Skyscrapers section of the book has been updated as well with new interpretations of skyscrapers in Indonesia Taiwan and China With the rapid pace of discovery in astronomy and astrophysics entirely new perspectives are emerging about dark matter inflation and the future of the universe The Power of Stars puts these discoveries in context and describes how they fit into the modern perspective of cosmology which has arisen from the universal human response to the sky that has inspired both ancient and modern cultures
