Nature's Northwest William G. Robbins, Katrine Barber, 2011-04-15. At the beginning of the twentieth century the greater Northwest was ablaze with change and seemingly obsessed with progress. The promotional literature of the time praising railroads population increases and the growing sophistication of urban living however ignored the reality of poverty and ethnic and gender discrimination. During the course of the next century even with dramatic changes in the region one constant remained inequality. With an emphasis on the region's political economy its environmental history and its cultural and social heritage this lively and colorful history of the Pacific Northwest defined here as Oregon Washington Idaho Montana and southern British Columbia places the narrative of this dynamic region within a national and international context. Embracing both Canadian and American stories in looking at the larger region renowned historians William Robbins and Katrine Barber offer us a fascinating regional history through the lens of both the environment and society.
