H. Th. Vollenhoven,2025-12-10 Dirk Vollenhoven professor of philosophy at the Free University of Amsterdam has hitherto been overshadowed by his more well known brother in law Herman Dooyeweerd Yet it was the two of them together who developed what has come to be known as Calvinistic philosophy The distinguishing characteristic of this philosophy is its presuppositional basis ostensibly in the Calvinistic understanding of the Christian religion This is a unique approach and it is on full display in Philosophy and Christianity the substance of a series of lectures given in South Africa in 1963 And the lecture format delivered primarily to undergraduate students makes for eminently accessible material Prof Vollenhoven takes his listeners on a journey through the entire history of philosophy assessing and categorizing a plethora of thinkers through the ages ranging from Heraclitus to Heidegger In this his unique and comprehensive framework of categorization is on full display Along the way he focuses on various specific topics of interest evolution psychology anthropology education science For good measure he throws in a Bible study And provides the icing on the cake in specific discussions of the relation of philosophy to the Christian faith Vollenhoven gives us a unique perspective on the relationship between philosophy and Christianity One of the benefits of his work is the opportunity it provides to compare and contrast his approach with Dooyeweerd s an exercise that adepts will find enticing The differences are there along with the similarities Beyond that Vollenhoven s approach is worthwhile in its own right It is high time that it were made available in a comprehensive manner to a wider English language audience

Hellenistic Ways of Deliverance and the Making of the Christian Synthesis John Herman Randall,1970 The Christian Virtues in Medical Practice Edmund D. Pellegrino,David C. Thomasma,1996-04-01 Christian health care professionals in our secular and pluralistic society often face uncertainty about the place religious faith holds in today s medical practice Through an examination of a virtue based ethics this book proposes a theological view of medical ethics that helps the Christian physician reconcile faith reason and professional duty Edmund D Pellegrino and David C Thomasma trace the history of virtue in moral thought and they examine current debate about a virtue ethic s place in contemporary bioethics Their proposal balances theological ethics based on the virtues of faith hope and charity with contemporary medical ethics based on the principles of beneficence justice and autonomy The result is a theory of clinical ethics that centers on the virtue of charity and is manifest in practical moral decisions Using Christian bioethical principles the authors address today s divisive issues in medicine For health care providers and all those involved in the fields of ethics and religion this volume shows how faith and reason can combine to create the best possible healing

**The Christian Science Journal** ,1899     The Word of Light Shlomo Giora Shoham,2008-12-18 One of the fundamental enigmas of our existence and for that matter God's existence is the act of creation Has the cosmos been created ex nihilo or was it an intelligent design by God Does God having created the world let it evolve and develop on its own subject to the rules of evolution and chance or does God intervene in every step of evolution in a deus ex machina manner What is the role of man in creation Is it as central as existentialism and quantum mechanics assure us that without human consciousness interacting with energy matter there would not be any objects and life forms Is man the crown of creation permanently or once evolution forms a more effective connecting agent between spirit and energy matter will man be relegated to the world of fossils The book concludes with a thorough examination of human norms values and morals As such this book constitutes a comprehensive treatise on the genesis of the world the birth of God and the role of man
