

TEXTUAL ANALYSIS

Textual analysis is a method used to interpret and understand written or spoken language to gain an understanding of meanings produced through text.

OVERVIEW

Textual analysis involves examining the structure, content, and context of a text to uncover its underlying meanings, themes, and patterns. This process typically involves identifying key ideas, analyzing the rhetorical strategies employed, and considering the cultural, historical, and social factors that may have influenced the text's creation.

EXAMPLE

- **Analysis of policy documents:** A scholar could analyze the policy documents of public companies to determine the evolving ways in which they approach, define, and prioritize Environmental and Social Responsibility as a key value of the companies. This could involve methods like thematic coding and word frequency analysis.

Textual Strategies:

Textual Strategies in Ancient War Narrative ,2018-11-26 In this collected volume fourteen experts in the fields of Classics and Ancient History study the textual strategies used by Herodotus and Livy when recounting the disastrous battles at Thermopylae and Cannae Literary linguistic and historical approaches are used often in combination in order to enhance and enrich the interpretation of the accounts which for obvious reasons confronted the authors with a special challenge Chapters drawing a comparison with other battle narratives and with other genres help to establish genre specific elements in ancient historiography and draw attention to the particular techniques employed by Herodotus and Livy in their war narratives

The

Strategy of Letters Mette Hjort,1993 Although literary theories describe a world of strategies textual discursive interpretive and political what is missing is the strategist Poststructuralists try to explain agency as the effect of large scale systems or formations as a result intuitions about individual action and responsibility are expressed in terms of impersonal strategies Mette Hjort s book responds to this situation by proposing an alternative account of strategic action one that brings the strategist back into the picture Hjort analyzes influential statements made by Derrida Foucault and others to show how proposed conceptions of strategy are contradictory underdeveloped and at odds with the actual use of the term Why then has the term acquired such rhetorical force Since strategy evokes conflict Hjort suggests its very use calls into question various pieties of idealism and humanism and emphasizes a desired break between modernism and postmodernism It follows that a theory of strategy must explore some of the psychological implications of conflict and Hjort pursues these implications through traditions as diverse as game theory discourse ethics and the philosophy of war Unstable frames self deception promiscuous pragmatism and social emotion are some of the phenomena she explores as she develops her account of strategic action in the highly competitive domain of letters In her reflection on strategy Hjort draws on such literary examples as Troilus and Cressida Tartuffe the autobiographical writings of Holberg and early modern French and English treatises on theater For its well informed and incisive arguments and literary historical case studies this book will be invaluable to literary theorists and will appeal to readers interested in drama philosophy and literature aesthetics and theories of agency and rationality
