**The 100 Most Influential Scientists** John Simmons, 1997 Who are the greatest scientists through the ages and why? From Archimedes to Newton to Einstein to Hawking, this book aims to furnish the answers. In biographical sketches that provide both historical and scientific context, the author chronicles the lives and accomplishments of some of the world's most influential figures in science. And more controversially, he then ranks them in order of influence.

[The 100 Most Important Chemical Compounds](#) Richard L. Myers, 2007-08-30 What is a chemical compound? Compounds are substances that are two or more elements combined together chemically in a standard proportion by weight. Compounds are all around us; they include familiar things such as water and more esoteric substances such as triuranium octaoxide, the most commonly occurring natural source for uranium. This reference guide gives us a tour of 100 of the most important common, unusual and intriguing compounds known to science. Each entry gives an extensive explanation of the composition, molecular formula and chemical properties of the compound. In addition, each entry reviews the relevant chemistry, history and uses of the compound with discussions of the origin of the compound's name, the discovery or first synthesis of the compound, production statistics and uses of the compound.

**The Engine of Scientific Discovery** Alexander Krauss, 2026-02-16 Many believe that discoveries arise by chance or serendipity. The Engine of Scientific Discovery illustrates for the first time how we can actively speed up the pace of new breakthroughs by developing better methods and tools of discovery.
