and Lori Boll share the challenges in special education relationships experienced through the lens of a special educator a parent of a son with profound disabilities and a child psychologist Ideally teachers therapists and parents working with students with special needs should form a cohesive team However these three parties often function as separate entities with different goals and objectives Over the past 25 years the authors have observed a consistent pattern of miscommunication and overlooking the importance of the mental and physical well being of each team member which contributed to poor collaboration This book takes readers on a journey through the process of discovering whether you have or are working with a student with special needs navigating how to best work with the student and other members of the team and lastly discussing ways to empower the reader and all members of the team The authors posit that if we understand one another s perspectives learn how to communicate more effectively and focus on self care we will increase Collective Efficacy and become the collaborative team our students need us to be As the first book to connect the concept of Collective Efficacy to special education this is a must read for teachers therapists and parents aiming to grasp the complexities of relationships in special education teams and better understand how mental health influences the effectiveness of each individual s role
