**Idea of Democracy in the Modern Era** Ralph Ketcham, 2004 Although the last half of the twentieth century has been called the Age of Democracy the twenty first has already demonstrated the fragility of its apparent triumph as the dominant form of government throughout the world Reassessing the fate of democracy for our time distinguished political theorist Ralph Ketcham traces the evolution of this idea over the course of four hundred years He traces democracy's bumpy ride in a book that is both an exercise in the history of ideas and an explication of democratic theory Ketcham examines the rationales for democratic government identifies the fault lines that separate democracy from good government and suggests ways to strengthen it in order to meet future challenges Drawing on an encyclopedic command of history and politics he examines the rationales that have been offered for democratic government over the course of four manifestations of modernity that he identifies in the Western and East Asian world since 1600 Ketcham first considers the fundamental axioms established by theorists of the Enlightenment Bacon Locke Jefferson and reflected in America's founding then moves on to the mostly post Darwinian critiques by Bentham Veblen Dewey and others that produced theories of the liberal corporate state He explains late nineteenth century Asian responses to democracy as the third manifestation grounded in Confucian respect for communal and hierarchical norms followed by late twentieth century postmodernist thought that views democratic states as oppressive and seeks to empower marginalized groups Ketcham critiques the first second and fourth modernity rationales for democracy and suggests that the Asian approach may represent a reconciliation of ancient wisdom and modern science better suited to today's world He advocates a reorientation of democracy that de-emphasizes group or identity politics and restores the wholeness of the civic community proposing a return to the Jeffersonian universalism that which informed the founding of the United States if democracy is to flourish in a fifth manifestation *The Idea of Democracy in the Modern Era* is an erudite interdisciplinary work of great breadth and complexity that looks to the past in order to reframe the future With its global overview and comparative insights it will stimulate discussion of how democracy can survive and thrive in the coming era

**Depth Psychology, Interpretation, and the Bible** Brayton Polka, 2001-02-12 Polka also raises the larger issue of the relationship between modernity hermeneutics and biblical ontology He argues that the origins and structure of modern values can be understood only through a theory of hermeneutics whose ontology overcomes the dualism between the secular and the religious between philosophy and religion Polka shows this to be possible when biblical ontology is understood to be at once rational and faithful secular and religious He uses the work of Spinoza Kant Hegel and Kierkegaard to articulate the ontological framework that makes clear how typically modern Freud is in being unable to account for the relationship of his thought to biblical religion Polka argues that Freudian metapsychology precisely because it cannot account for its own principles of explanation contradicts the insights of depth psychology Paradoxically religion returns in Freud as the repressed as it does in so much of modern thought Polka shows that what is therefore required is a hermeneutical theory whose ontological articulation of biblical religion is critically self-conscious *The Passion of Charles*

Péguy Glenn H. Roe, 2014 In many ways the development of twentieth century literary criticism and theory can be seen as a prolonged struggle against the pervading influence of nineteenth century positivist historicism Anglo American New Criticism and later French Post structuralism and Deconstruction are the best known instances of this conflict Less widely known but no less important to contemporary literary studies are Charles Péguy's earlier debates with French academic historicism in the years leading up to World War One First examined by Antoine Compagnon in his ground breaking work *La Troisième République des lettres* in 1983 it is a period in French literary and cultural history that remains some thirty years later largely untreated in English This book thus addresses an important albeit relatively unexplored moment in the development of twentieth century literary history and theory By way of Péguy's foundational polemics with modernity and his role in the related crisis of historicism we gain a better understanding of the critical basis from which similar anti positivist and anti historicist critiques were later enacted on both sides of the Atlantic In situating Péguy's passions and polemics within the larger cultural and historical context Glenn H Roe invites us to reconsider and re evaluate Péguy's place among twentieth century literary figures Beyond its literary critical aspects *The Passion of Charles Péguy* provides a general view of early twentieth century debates related to the role of literary studies in modern society the reform of the French educational system and the formation of literary history as an academic discipline in both France and abroad [The Encyclopedia of Apocalypticism: Apocalypticism in the modern period and the contemporary age](#) John Joseph Collins, Bernard McGinn, Stephen J. Stein, 1998 *Lyotard and the End of Grand Narratives* Gary K. Browning, 2000 Lyotard's work challenges the presumption and orientation of modern political philosophy In particular he repudiates attempts to justify knowledge and society in terms of grand narratives of for example the liberation of mankind or the immanence of science He argues that the totalising perspective of these meta narratives is superseded by a post modern acceptance of difference and variety and a scepticism towards unifying meta theories *The Modern French Drama* Augustin Filon, 1898 **Le Corbusier & the Architecture of Reinvention** Tim Benton, Peter Carl, Hilde Heynen, Charles Jencks, Le Corbusier, 2003 Charles Edouard Jeanneret set about the task of reinventing everything he had touched from himself to architecture Famously he began with his own name His resonant pseudonym Le Corbusier meant crow like and he spent most of his career observing the wide horizon of worldwide developments *The modern French drama, essays, tr. by J.E. Hogarth* Pierre Marie Augustin Filon, 1898 *International Education: Politics and Policies* Ma José GARCÍA RUIZ, 2013-04-01 The present book aims to analyse key features of the field of International Education It also intends to study crucial elements of the relevant dimensions of the dichotomy Politics versus Policies Educational policy and politics together constitute a vast field of research and intellectual endeavour Policy and Politics are two words that are often confused with regard to their connotations There is in fact some difference between the two words Policy is a principle Politics is all about organizational process **Proceedings of the International Joint Conference on Arts and Humanities 2024 (IJCAH 2024)** Cicilia D.
