Friend v. Friend Ethan J. Leib, 2011-01-07 Friendship is one of our most important social institutions. It is not only the salve for personal loneliness and isolation; it is the glue that binds society together. Yet for a host of reasons—longer hours at work, the Internet, suburban sprawl—many have argued that friendship is on the decline in contemporary America. In social surveys, researchers have found that Americans on average have fewer friends today than in times past. In *Friend v. Friend*, Ethan J. Leib takes stock of this most ancient of social institutions and its ongoing transformations and contends that it could benefit from better and more sensitive public policies. Leib shows that the law has not kept up with changes in our society; it sanctifies traditional family structures but has no thoughtful approach to other aspects of our private lives. Leib contrasts our excessive legal sensitivity to marriage and families with the lack of legal attention to friendship and shows why more legal attention to friendship could actually improve our public institutions and our civil society. He offers a number of practical proposals that can support new patterns of interpersonal affinity without making friendship an onerous legal burden. An elegantly written and highly original account of the changing nature of friendship, *Friend v. Friend* upends the conventional wisdom that law and friendship are inimical and shows how we can strengthen both by seeing them as mutually reinforcing.

Self-Study Teacher Research Anastasia P. Samaras, 2010-04-22 Offer novice and experienced teachers guidelines for the how and why to do self-study teacher research. Designed to help teachers plan, implement, and assess a manageable self-study research project, this unique textbook covers the foundation, history, theoretical underpinnings, and methods of self-study research. Written in a reader-friendly style and filled with interactive activities and examples, this book helps teachers every step of the way as they plan and conduct their studies. Author Anastasia Samaras encourages readers to think deeply about both the how and the why of this essential professional development tool as they pose questions and formulate personal theories to improve professional practice. **Key Features:** A Self-Study Project Planner assists teachers in understanding both the details and process of conducting self-study research. A Critical Friends Portfolio includes innovative critical collaborative inquiries to support the completion of a high-quality final research project. Advice from the most senior self-study academics working in the U.S. and internationally is included along with descriptions of the self-study methodology that has been refined over time. Examples demonstrate the connections between self-study research, teachers' professional growth, and their students' learning. Tables, charts, and visuals help readers see the big picture and stay organized. Accompanied by high-quality ancillaries, a Student Study Site offers a wealth of resources, including additional examples and activities, web-based resources, study questions, and key terms. **Intended Audience:** *Self-Study Teacher Research: Improving Your Practice Through Collaborative Inquiry* is intended as a core textbook for a wide variety of courses in the education curriculum, including Action Research, Qualitative Research Methods, Research Methods in Education, and the capstone teacher researcher course required of all early childhood, elementary, and secondary education majors. **The Coding**

Manual for Qualitative Researchers Johnny Saldana, 2021-01-27 This invaluable manual from world renowned expert Johnny Salda illuminates the process of qualitative coding and provides clear insightful guidance for qualitative researchers at all levels The fourth edition includes a range of updates that build upon the huge success of the previous editions A structural reformat has increased accessibility the 3 sections from the previous edition are now spread over 15 chapters for easier sectional reference There are two new first cycle coding methods join the 33 others in the collection Metaphor Coding and Themeing the Data Categorically Includes a brand new companion website with links to SAGE journal articles sample transcripts links to CAQDAS sites student exercises links to video and digital content Analytic software screenshots and academic references have been updated alongside several new figures added throughout the manual It remains the only book that looks specifically at coding qualitative data as a core but often neglected skill that researchers and students alike need to effectively make sense of their data and to identify patterns before they can analyse the material Saldana presents a range of coding options with advantages and disadvantages to help researchers to choose the most appropriate approach for their project reinforcing their perspective with real world examples used to show step by step processes and to demonstrate important skills

Seasonal to Decadal Prediction of Marine Ecosystems: Opportunities, Approaches, and Applications Mark R.

Payne, Alistair J. Hobday, Brian R. MacKenzie, Desiree Tommasi, 2019-06-28 Tremendous advances in oceanographic observing and modeling systems over the last decade have led to unprecedented developments in the nature of information available to marine science While improvements in observational technologies and networks have garnered much attention remarkable developments in forecasting the ocean have received much less focus Exploiting this new predictive skill to improve scientific understanding generate advice and aid in the management of marine resources is emerging as one of the new challenges of marine science Translating predictions of the physical environment into biological outcomes however is not straightforward Fisheries scientists for example have been trying to understand the links between physics and biology and generate predictions of variables such as recruitment for close to a century with limited success Nevertheless spatial distributions and

the timing of key events which have received less focus are often tightly linked to the physical environment and may have management relevant applications The first such forecasts based on this skill are now starting to emerge This *Frontiers in Marine Science* Research Topic provides a snapshot of the state of the art in Marine Ecological Prediction It covers the opportunities for developing such forecasts technical approaches that could be employed and examples where the technology is already being applied This body of work therefore marks an important milestone on the route to developing this new and exciting field of marine science
