Situational Project Management Oliver F. Lehmann, 2016-08-19 Most project managers would agree that every project is unique. But not all project managers would agree that the best way to manage a unique project is unique. Many still cling to the old practice of having a methodology that is applied to all projects. One size fits all is still in common use and this approach has proven to lead to project failure. Flexibility, situational intelligence and creativity are essential to deliver project success. The need to recognize and master ever changing requirements and environmental conditions is a tough challenge for professional project managers. The same practices that led to success yesterday may cause failure today. Selecting favorable responses to a given situation is often the most critical factor of the dynamics of success and failure. This book is designed to help project professionals assess a situation, predict the appropriate approach, methodology and achieving styles and then apply them in a situational fashion. To guide project managers in selecting the appropriate responses, Situational Project Management SitPM shows how to assess a given project, determine its unique characteristics and select the appropriate methods to complete the project. With this book, project managers can use SitPM to develop profiles of their projects on the basis of the projects physical characteristics, the project teams behavioral characteristics, the enterprise environment and the market environments receiving project deliverables. These profiles help project managers to determine the appropriate project life cycle approach and leadership style. The book also explores various ways to engage stakeholders on the basis of a project's SitPM profile. The book's author, Oliver F. Lehmann, has developed a set of templates to apply SitPM in practice. It can be downloaded from www.oliverlehmann.com/SitPM_Templates.zip

Sports Business Management George Foster, Norm O'Reilly, Antonio Dávila, 2016-01-08 Sports Business Management will equip students with a comprehensive understanding of the sport industry. With a focus on management, strategy, marketing and finance, the decision making approach of the book emphasizes key concepts while translating them into practice. Foster, O'Reilly and Dávila present a set of modular chapters supported with plenty of examples, mini cases and exercises to help students apply the decision making approach to real world situations. Covering an international array of sports and organizations including the Olympic Games, FIFA World Cup, US Major League Baseball and more, the book also covers unique topics such as diversity in sport, the impact of technology and social media. Rounding this out, the book provides around 50 Harvard, Stanford cases along with case notes for instructors. This is an ideal textbook for upper level undergraduate and graduate students of sports business and management, fully supported by a companion website featuring PowerPoint slides, test questions, teaching notes and other tools for instructors.
