Kaiser,Monty Krieger,Anthony Bretscher,Hidde Ploegh,2012-05    **Assessment and Simulation Tools for Sustainable Energy Systems** Fausto Cavallaro,2013-08-13 In recent years the concept of energy has been revised and a new model based on the principle of sustainability has become more and more pervasive The appraisal of energy technologies and projects is complex and uncertain as the related decision

making has to encompass environmental technical economic and social factors and information sources. The scientific procedure of assessment has a vital role as it can supply the right tools to evaluate the actual situation and make realistic forecasts of the effects and outcomes of any actions undertaken. *Assessment and Simulation Tools for Sustainable Energy Systems* offers reviews of the main assessment and simulation methods used for effective energy assessment. Divided across three sections *Assessment and Simulation Tools for Sustainable Energy Systems* develops the reader's ability to select suitable tools to support decision making and implementation of sustainable energy projects. The first is dedicated to the analysis of theoretical foundations and applications of multi criteria decision making. This is followed by chapters concentrating on the theory and practice of fuzzy inference neural nets and algorithms genetics. Finally simulation methods such as Monte Carlo analysis mathematical programming and others are detailed. This comprehensive illustration of these tools and their application makes *Assessment and Simulation Tools for Sustainable Energy Systems* a key guide for researchers scientists managers politicians and industry professionals developing the field of sustainable energy systems. It may also prompt further advancements in soft computing and simulation issues for students and researchers.

**Delivery Systems** Ranjita Shegokar, Yashwant Pathak, 2023-04-10. The disability adjusted life year DALY is a generic measure of health effect that can be used in cost effectiveness analysis as an alternative to the quality adjusted life year QALY. Infectious diseases are one of the major to cause significant losses of DALY and QALY. Human infectious diseases are disorders that are triggered by the micro organisms such as bacteria fungi viruses or parasites. The majority of such diseases are contagious and create a public health menace. There are several reasons why infectious diseases are deadly diseases and one of the primary reasons is the drug resistance developed over time. Drug resistance associated mutations are linked to increasing drug efflux modifications of the drugs or their targets. Every year new drugs are being approved by FDA to treat infectious diseases. Nonetheless the infectious diseases will undoubtedly persist as permanent and main threats to humanity for now and in the future primarily due to increased longevity that almost always comes at a cost of impaired immunity. A total of four books are covered under the series of Infectious drug diseases. Malaria drug delivery systems. Tubercular drug delivery systems. Viral drug delivery systems. Infectious disease drug delivery systems. The third volume of series is focused on viral drug delivery systems. Typically virus attaches to the cells referred as host cell and releases its DNA or RNA inside the cell. In second stage virus's genetic material takes control of the cell and forces it to replicate the virus leading to onset of disease symptoms. DNA class of viruses include Herpes Papilloma and Adeno viruses. RNA class of viruses include retroviruses such as HIV immunodeficiency virus and SARS COV 2 Corona virus. This book addresses recent developments in viral drug delivery systems. It covers many different aspects of viral infections ways to treat them using modern drug delivery systems like nano particulate carriers. The choice of viral delivery systems mainly depends upon the type of virus duration of life cycle presence of drug resistance cellular and mucosal interaction of virus accordingly gene or non gene drug delivery.

systems are selected. Besides that this book also reports global dynamics of viral diseases future predictions of infection rate current treatment options details of drug carriers like nanoemulsions polymeric nanoparticles role of biofunctionalization and phyto molecules in treatment of viral infections particularly herpes Covid 19 Ebola HIV AIDS influenza and viral hepatitis. Audiences from a broad range of groups from researchers academicians and public health bodies to regulatory experts can benefit from the compiled information to learn more about patient needs and current research advances in the field of viral drug delivery research. *Management Decision Support Systems* Andrew M. *Bioinformatics Tools for Predictive Ecology and Fisheries* Basanta Kumar Das, Vikash Kumar, Suvra Roy, 2026-01-05 This book covers information on bioinformatics tools along with their applications in predictive ecology and fisheries. With the generation of large molecular biological data the analytical techniques have also undergone recent advancements. Novel algorithms that are specialized to deal with data associated with biological phenomenon such as gene expression and protein interactions have been generated. Ecological data analysis has also adopted these advanced bioinformatic tools for a more explorative approach. This book identifies and explains these advanced technologies. It also focuses on the development of models that identify functionally equivalent species in different fish communities to predict functional collapse. Each section of the book is detailed with practical information step by step procedures and relevant illustrations. This book is a resource for professionals and researchers working in the field of fisheries and bioinformatics. **Decision Support Systems**

**Research and Reference Disciplines, 1970-2001** Sean B. Eom, 2003 This is a research guide and bibliography with citation frequency on the decision support systems research area and its references disciplines. It contains only references that have been cited frequently by more than several thousand authors of decision support systems articles published in a set of carefully selected journals according to objective criteria set forth in a data chapter. Each item in the bibliography of the book contains the citation frequency representing its weight and degree of influence on the decision support systems research. Each item represents objective and unobtrusive judgment of all the authors of major articles published in more than 140 information systems journals during 1970-2001. It will be a useful research guide to the DSS literature. *Readings in Management Information Systems* Gordon Bitter Davis, Gordon C. Everest, 1976
