

## Key features of the controlled economy

4. Much investment is not used on consumer goods but on military goods (army tanks, guns, space exploration). This was especially the case in Russia and China;
5. Citizens live in a highly regimented society, with gov't officials, police or even soldiers on nearly every street corner – even on farms, to check on production
6. Oppression, high unemployment and poverty are prevalent;
7. Tightly controlled (and often poor) economic and social conditions tend to result in de-motivation, disaffection and ultimately defection of citizens and a brain drain.

## **The Controlled Economy:**

*The Controlled Economy (Routledge Revivals)* James E. Meade, 2012-11-12 First published in 1971 this volume applies the tools of static and of dynamic analysis outlined in *The Stationary Economy* and *The Growing Economy* to the control of a dynamic economy. This involves a discussion of subjects such as the theory of indicative planning and the planning by the government of its monetary, fiscal and incomes policies for the purposes of the short run stabilization of the economy and of ensuring the best long run use of the community's resources. Special emphasis is laid on the planning of such policies in conditions in which many future events remain inevitably uncertain. This book considers these issues in relation to a competitive free enterprise economy and little or no reference is made to problems of monopoly or of distinctions between social and private costs and benefits due to indivisibilities and externalities in economic life.

*The controlled economy* James Edward Meade, 1965     [Socio-Economic Origins of Neocolonialism and African States' Responses since 1960](#) Teshale Aklilu, 2023-01-09 Academic Paper from the year 2022 in the subject History of Europe Colonialism language English abstract This paper tries to show the socio economic origins of neocolonialism and the African States response since 1960. This research employs a qualitative study based on a careful examination of books pertinent published journal articles and other works that have been consulted cross checked and reinterpreted. The outcome demonstrates that since the 1960s former colonial powers have sought to maintain their former position of agricultural product and raw material attachment with newly independent African states. Finally some African state leaders such as Nkrumah, Nyerere, Milton Obote and others provided an exemplary response to the expansion of neocolonialist powers in Africa by focusing on a thorough explanation of dependency theory and advising African leaders to fight neocolonialists in the economic sphere and they began cooperation by holding conferences and signing an agreement to combat neocolonialism.

*Control of Restrictive Business Practices in Latin America* Eduardo White, 1975     *Economic Legislation of All the States* Allen Ripley Foote, Charles Edward Everett, 1892     *The Logic of the Planned Economy* Paweł H. Dembinski, 1991 This timely book examines and seeks to explain the inner contradictions of centrally planned economies and shows how the seeds of their collapse had existed within the system from the very start. The author shows how the orthodox ideological principles of the system rendered it inflexible and incapable of reform and thus unable to transform itself into an efficient modern economy. Though the system as such has ceased to exist it is as yet only the rules that have disappeared the system's components continue to exist and the author argues a proper understanding of the origins and previous functions of each component is necessary if it is to be integrated into the new system.     *Some Reflections on the Controlled Economy* Sir Dennis Holme Robertson, 1946     [A Treatise on the Measure of Damages](#) Theodore Sedgwick, Arthur George Sedgwick, 1891     [The Lancet](#), 1946     [JPRS Report](#), 1991-03     **Great Britain and the East ...**, 1917     [Quarterly Review](#) Skandinaviska
