The Cosmic Connection An Extraterrestrial Perspective:

The Cosmic Connection Carl Sagan, 1975 *Carl Sagan's Cosmic Connection* Carl Sagan, 2000-08-31 A classic book by the world's most famous scientist and science visionary back in print with a new perspective **The Cosmic Connection** Carl Sagan, 1975 **Oracles of Science** Karl Giberson, Mariano Artigas, 2009-02-27 Oracles of Science examines the popular writings of the six scientists who have been the most influential in shaping our perception of science how it works and how it relates to other fields of human endeavor especially religion Biologists Stephen Jay Gould Richard Dawkins and Edward O Wilson and physicists Carl Sagan Stephen Hawking and Steven Weinberg have become public intellectuals articulating a much larger vision for science and what role it should play in the modern worldview The scientific prestige and literary eloquence of each of these great thinkers combine to transform them into what can only be called oracles of science Their controversial often personal sometimes idiosyncratic opinions become widely known and perceived by many to be authoritative Curiously the leading oracles of science are predominantly secular in ways that don't reflect the distribution of religious beliefs within the scientific community Many of them are even hostile to religion creating a false impression that science as a whole is incompatible with religion Karl Giberson and Mariano Artigas offer an informed analysis of the views of these six scientists carefully distinguishing science from philosophy and religion in the writings of the oracles This book will be welcomed by many who are disturbed by the tone of the public discourse on the relationship between science and religion and will challenge others to reexamine their own preconceptions about this crucial topic Cosmos & Culture Steven J. Dick, Mark Lupisella, 2009 From GPO Bookstore's Website Authors with diverse backgrounds in science history anthropology and more consider culture in the context of the cosmos How does our knowledge of cosmic evolution affect terrestrial culture Conversely how does our knowledge of cultural evolution affect our thinking about possible cultures in the cosmos Are life mind and culture of fundamental significance to the grand story of the cosmos that has generated its own self understanding through science rational reasoning and mathematics Book includes bibliographical references and an index **Civilized Life in the Universe** George Basalla, 2006-01-19 From Aristotle to Stephen Hawking some of the most prominent Western scientists have had definite perceptions and misperceptions about the existence of civilized life on other planets Johannes Kepler who transformed astronomy with his work on the shape of planetary orbits was quite sure that engineers on the Moon excavated circular pits to provide shelter for lunar inhabitants Christian Huygens the most prominent scientist between Galileo and Newton criticized Kepler's speculations but used probability theory to prove that planetarians on other worlds were much like humans and practiced the science of astronomy Carl Sagan indicted Huygens as a biological chauvinist but failed to see that he was a cultural chauvinist when he assumed that alien life would have a technology similar to ours though far more advanced This book traces the influence of one speculation on the next showing an unbroken but twisting chain of ideas as it passes from ancient to modern times and from science to culture and back again Throughout the author

interweaves his own view that scientific belief in and search for extraterrestrial civilizations is an impulse that is part anthropomorphic and part secularized religious BOOK JACKET *Space, Time, and Aliens* Steven J. Dick, 2020-05-11 In this comprehensive and interdisciplinary volume former NASA Chief Historian Steven Dick reflects on the exploration of space astrobiology and its implications cosmic evolution astronomical institutions discovering and classifying the cosmos and the philosophy of astronomy The unifying theme of the book is the connection between cosmos and culture or what Carl Sagan many years ago called the cosmic connection As both an astronomer and historian of science Dr Dick has been both a witness to and a participant in many of the astronomical events of the last half century This collection of papers presents his reflections over the last forty years in a way accessible to historians philosophers and scientists alike From the search for alien life to ongoing space exploration efforts readers will find this volume full of engaging topics relevant to science society and our collective future on planet Earth and beyond **Gaither's Dictionary of Scientific Quotations** Carl C.

Gaither, Alma E. Cavazos-Gaither, 2008-01-08 Scientists and other keen observers of the natural world sometimes make or write a statement pertaining to scientific activity that is destined to live on beyond the brief period of time for which it was intended This book serves as a collection of these statements from great philosophers and thought influencers of science past and present It allows the reader quickly to find relevant quotations or citations Organized thematically and indexed alphabetically by author this work makes readily available an unprecedented collection of approximately 18 000 quotations related to a broad range of scientific topics **Exploring the Human Aura** Nicholas M. Regush, Jan Merta, 1975 Biography

The Modern Myth, Ancient Astronauts and UFOs Morris Goran, 1978 *Rhetorical Criticism* Sonja K. Foss, 1989 Offers students an excellent example of the diversity breadth of rhetorical criticism **Discoveries: Birth of the Universe**

Trinh Xuan Thuan, 1993-10 Centering on the big bang theory the author discusses the achievements of astronomy from ancient times to the present and also human s attempts to find alien life forms and other unsolved mysteries Part of Abrams new Discoveries theories 179 color illustrations **Contemporary Astronomy** Jay M. Pasachoff, 1977 **Authors & Artists for Young Adults**, 1989

To the Edges of the Universe Don DeNevi, 1978 DeNevi reviews the achievement of the space program which has vastly expanded man s astronomical knowledge and looks at the future of space exploration and the opportunities it offers such as virtually unlimited sources of power and pollution free manufacturing facilities He is confident that before the year 2000 permanent lunar bases and orbiting space stations will have become a reality opening the way to colonization of the solar system **Readers Advisory Service**, 1975 **Evolutionary Perspectives on**

Human Reproductive Behavior Dori LeCroy, Peter Moller, 2000 A central aspect of human adaptation reproductive behaviour is studied through the multiple lenses of philosophy biology psychology and anthropology all united by an evolutionary perspective Although reproduction is an intrinsic mechanism of evolution this colloquium shows that reproductive behaviours yield new significance for evolution theory when re examined in a multidisciplinary setting This

volume focuses on explication of the adaptive evolved nature of our own reproduction with topics such as how mate choice shaped human nature symmetry in mate selection the evolution of moral dispositions and the sexist order of the bonobos This look at reproduction as a mechanism of human evolution reveals underlying physiologic mechanisms as well as comparative and interesting cross cultural aspects that emerge from social sciences and anthropology The Publishers Weekly ,2000

New Scientist and Science Journal ,2000 *The Origin and Evolution of Life on Earth* David W. Hollar,1992 Covers the major works from the late 1800s to the present Aimed at anyone interested in the subject regardless of whether the reader is a layperson a high school or college student or a research scientist
