The Cosmic Cycle:

The Cosmic Cycle Max Waldemar Kurniker,1934 **empedocles' cosmic cycle** , *Explaining Mantras* Robert A. Yelle,2004-03-01 Explaining Mantras explores the intersection of poetry and magic in the mantras or verbal formulas of Hindu Tantra The author reveals how mantras work in light of both the esoteric tradition of Tantra and a general semiotic theory of ritual Mantras mimic the act of sexual reproduction and the cosmic cycle of creation and destruction A mantra that imitates creation is believed to be more creative and effective in producing a real world result Drawing from linguistics semiotics anthropology and philosophy as well as the history of religions the author argues that mantras and other ritual discourses use rhetorical devices including imitation to construct the persuasive illusion of a natural language one with a direct and immediate connection to reality This vital relation between poetry and ritual has been neglected in many current theories of religion Explaining Mantras combines the study of ancient Tantric rituals with the latest theories in the human sciences and will be of interest to a broad range of readers **Involution and Evolution According to the Philosophy of Cycles** Kalpa,1894 *The Cosmic Cycle* Theodore Peck Snow,1984 A fine introduction to astronomy complete with 34 excellent color plates **A Companion to the Philosophy of Time** Adrian Bardon,Heather Dyke,2015-11-02 A Companion to the Philosophy of Time presents the broadest treatment of this subject yet 32 specially commissioned articles written by an international line up of experts provide an unparalleled reference work for students and specialists alike in this exciting field The most comprehensive reference work on the philosophy of time currently available The first collection to tackle the historical development of the philosophy of time in addition to covering contemporary work Provides a tripartite approach in its organization covering history of the philosophy of time time as a feature of the physical world and time as a feature of experience Includes contributions from both distinguished well established scholars and rising stars in the field **A Cosmic Cycle** Frank Washington Very,1902 **The Nature of Consciousness, the Structure of Reality** Jerry Davidson Wheatley,2001 This book describes how understanding the structure of reality leads to the Theory of Everything Equation The equation unifies the forces of nature and enables the merging of relativity with quantum theory The book explains the big bang theory and everything else **Asian Millenarianism** Hong Beom Rhee,2007 This groundbreaking book reexamines the Taiping and the Tonghak movements in 19th century Asia Providing an understanding of the movements as an expression in part of deeply rooted Asian spiritual ideas the work also offers historical and philosophical reflections on what studies of Asian millenarianism can contribute to the comparative study of millenarianism *The Theosophist* ,1886
