**The Art Experience** Alex Rajczi, 2024-04-24 The Art Experience An Introduction to Philosophy and the Arts takes readers on an engaging and accessible journey that explores a series of fundamental questions about the nature of art and aesthetic value. The book's 12 chapters explore three questions: What makes something a work of art? How should we experience art to get the most out of it? Once we understand art, how should we evaluate whether it is good or bad? Philosophical theory is illustrated with concrete examples: the paintings of Frida Kahlo, the music of Johann Sebastian Bach, the masks of the Nso people, and many others. Classic questions are balanced with cutting edge challenges such as Linda Nochlin's work on the exclusion of women from the artistic canon. The Art Experience presupposes no prior knowledge of philosophy or art and it will be of interest to any reader seeking an accessible and engaging introduction to this field. Along the way readers learn how philosophical theories can affect our real world experiences with painting, music, theater, and many other art forms. Key Features: Accessible for any college student assumes no knowledge of philosophy, art theory, or any artistic medium. Organizes topics conceptually rather than historically, allowing students to more easily grasp the core issues themselves rather than tracing their historical evolution. Offers readers a large number of contemporary examples and a consistent focus on the way theory can affect people's real world experiences with art. Explores questions about bias, for example whether the artistic canon has excluded some groups unfairly and whether definitions of art are Western biased.

[The Art of War for Talent. How Companies Can Gain a Competitive Advantage by Fostering a Culture of Intrinsic Motivation and Meaningful Work](#) Niklas Baier, 2020-04-23 Bachelor Thesis from the year 2019 in the subject Business economics Review of Business Studies grade 1 3 Technical University of Munich TUM School of Management Chair for Management Accounting language English abstract The bachelor thesis combines theories, literature, lab and field experiments, event studies from the industry and its very own empirical research to argue from both a strategic as well as a financial perspective that an inimitable organizational culture of intrinsic motivation and meaningful work may constitute a source of competitive advantage within the War for Talent. The thesis strives at highlighting the importance for firms to adapt to the newly emerged competitive environment that the ongoing War for Talent has created by considering their people as their most valuable asset for the success of the organization as already hinted at throughout The Art of War by Sun Tzu in 500 BC hence the reference in the title of this thesis. After a brief review of the circumstances that led to the emergence of the War for Talent and first implications for the industry it is argued from a strategic perspective why motivated talent depicts the key resource for competitive advantage and why conventional extrinsic incentive measures aimed at maximizing productivity are no longer effective. Afterwards a proposition will be made of how capitalizing on intrinsic motivation human's inner drive to accomplish inherently interesting and challenging tasks fostered through a framework of meaningful work might be the decisive driver to get ahead in the quest for talent. A second string of argumentation draws a connection

between meaningful work and superior financial performance This proposition is then tested by an empirical analysis comparing the financial performance of publicly traded companies featured on the 2017 Fortune 100 Best Companies to Work For list against a control portfolio and the broad market confirming significant differences for cumulative stock returns
