*The Cosmic Connection* Carl Sagan,1975    *Carl Sagan's Cosmic Connection* Carl Sagan,2000-08-31 A classic book by the world's most famous scientist and science visionary back in print with a new perspective    [The Cosmic Connection](#) Carl Sagan,1975

**Oracles of Science** Karl Giberson,Mariano Artigas,2009-02-27 Oracles of Science examines the popular writings of the six scientists who have been the most influential in shaping our perception of science how it works and how it relates to other fields of human endeavor especially religion Biologists Stephen Jay Gould Richard Dawkins and Edward O Wilson and physicists Carl Sagan Stephen Hawking and Steven Weinberg have become public intellectuals articulating a much larger vision for science and what role it should play in the modern worldview The scientific prestige and literary eloquence of each of these great thinkers combine to transform them into what can only be called oracles of science Their controversial often personal sometimes idiosyncratic opinions become widely known and perceived by many to be authoritative Curiously the leading oracles of science are predominantly secular in ways that don't reflect the distribution of religious beliefs within the scientific community Many of them are even hostile to religion creating a false impression that science as a whole is incompatible with religion Karl Giberson and Mariano Artigas offer an informed analysis of the views of these six scientists carefully distinguishing science from philosophy and religion in the writings of the oracles This book will be welcomed by many who are disturbed by the tone of the public discourse on the relationship between science and religion and will challenge others to reexamine their own preconceptions about this crucial topic

**Cosmos & Culture** Steven J. [Civilized Life in the Universe](#) George Basalla,2006-01-19 From Aristotle to Stephen Hawking some of the most prominent Western scientists have had definite perceptions and misperceptions about the existence of civilized life on other planets Johannes Kepler who transformed astronomy with his work on the shape of planetary orbits was quite sure that engineers on the Moon excavated circular pits to provide shelter for lunar inhabitants Christian Huygens the most prominent scientist between Galileo and Newton criticized Kepler's speculations but used probability theory to prove that planetarians on other worlds were much like humans and practiced the science of astronomy Carl Sagan indicted Huygens as a biological chauvinist but failed to see that he was a cultural chauvinist when he assumed that alien life would have a technology similar to ours though far more advanced This book traces the influence of one speculation on the next showing an unbroken but twisting chain of ideas as it passes from ancient to modern times and from science to culture and back again Throughout the author

interweaves his own view that scientific belief in and search for extraterrestrial civilizations is an impulse that is part anthropomorphic and part secularized religious BOOK JACKET **Space, Time, and Aliens** Steven J. Dick,2020-05-11 In this comprehensive and interdisciplinary volume former NASA Chief Historian Steven Dick reflects on the exploration of space astrobiology and its implications cosmic evolution astronomical institutions discovering and classifying the cosmos and the philosophy of astronomy The unifying theme of the book is the connection between cosmos and culture or what Carl Sagan many years ago called the cosmic connection As both an astronomer and historian of science Dr Dick has been both a witness to and a participant in many of the astronomical events of the last half century This collection of papers presents his reflections over the last forty years in a way accessible to historians philosophers and scientists alike From the search for alien life to ongoing space exploration efforts readers will find this volume full of engaging topics relevant to science society and our collective future on planet Earth and beyond
