The Creating Consciousness Science As The Language Of God:

The Creating Consciousness Arne A. Wyller, 1999 Ours is a literal world We spend so many words arguing the fundamental truth of a few ancient metaphors that we finally close them to personal meaning Or we commit our energies to washing every literary form and figure of speech cleanly away to protect our definitions of correctness and to make everyday thinking even safer But the arguing gives us doctrines And the purging denies us poetry And when all the metaphors are gone we find we ve lost the richest ways of knowing We find we ve even narrowed the possibility Divina is a line of speculative dimensional and metaphorical books that will Challenge conventional wisdom Offer alternative theories Recreate noumenal experiences Reach for poetry and Promise other ways of knowing The most rewarding reading addresses us personally and challenges what we believe Divina will bring you books that do just that chosen and published with the same dedication and editorial sensibility that have established our commitment t literary quality **Science and Spiritual Quest**, 2008 Creation Research Society Quarterly Creation Research Society, 2004 **Perspectives on Science and Christian Faith**, 2007 **The Flaming Sword**, 1899 **The Utne Reader**, 1999-11 **The Sheldrake Shift** Dr. Thomas Stark, You think you understand Rupert Sheldrake s theory of formative causation and morphic resonance You have no idea how deep the rabbit hole goes Sitting beneath his theory is the most extraordinary theory of all the theory that changes everything **God's Autopsy and the Living Truth of Soul** Hal Childs, 2022-08-22 The Grand Narrative of Christianity that the Bible created is dead and the Bible is silent Does the Bible have anything relevant to say to our modern circumstances We ask where did God come from What happened to God God s Autopsy reinterprets soul and God as historical psychological phenomena related to the cultural structure of consciousness the invisible shared context of thought which has changed dramatically over the past three millennia This book offers a new way to understand the trajectory of Western civilization by making the implicit foundation of Western consciousness soul visible and conscious Our modern Western consciousness is radically different from that of antiquity when the Bible emerged Jung s psychological philosophical insight that whenever we speak about the psyche it is the psyche speaking about itself leads to the realization that today consciousness has come home to itself Beginning with preliterate polytheism the emergence of the transcendent god Yahweh and Christ which led directly to the Enlightenment objective soul continues to unfold itself How did late modernity become a topsy turvy quantum virtual digital impersonal and abstract world that appears to be running away from us The answer is unexpectedly and shockingly in the Bible itself **Yoga Psychology and the Transformation of Consciousness** Don Salmon, Jan Maslow, 2007-09 From the perspective of yoga psychology the view from infinity even our basest instincts our most mundane acts and our greatest follies can be understood as the limited or distorted expressions of a purposeful compassionate and infinite intelligence Yoga Psychology is based on the writings of Sri Aurobindo the revolutionary poet and philosopher who founded the independence movement in India later led by Mahatma Ghandi **The Boston Journal of**

Artificial General Intelligence (AGI) and the Image of God Peter J. Bellini,2023-09-19 Can artificial intelligence AI attain human level consciousness And if so should the church minister salvation to AI Through engaging philosophy of mind AI research the cognitive sciences neuroscience and theological anthropology Dr Bellini attempts to answer these questions The hypothesis is if the hard problem of consciousness can be solved and if human consciousness is replicable in AI then attaining artificial general conscious intelligence AGCI is possible and perhaps needs to be evangelized or disciplined as some claim On the contrary if the hard problem of consciousness cannot be solved and human consciousness is not replicable in AI then AGCI is not possible and it does not need to be evangelized And in either case how can the church begin a theological conversation with AI with its potential to match and exceed human intelligence and performance A theological position on consciousness and the image of God is proposed demonstrating the uniqueness of human consciousness in contrast with AI and artificial consciousness A thorough exposition of the image of God is offered to serve as a cornerstone for any future conversation on a theological perspective of machines AI *Rational Religion and Morals: Presenting Analysis of the Functions of Mind, Under the Operations and Directions of Reason* Thomas J.
