Architecture Theology and Ethics Making Architectural Design More Just argues that architecture design and creativity are theological ethical concerns that ought to be considered more deeply by Christians who are committed to social and environmental justice Elise M Edwards discusses the significance of architectural design entering into ongoing conversations in theological ethics and aesthetics She argues that architectural design is not just a professional practice for wealthy clients but rather an activity that everyday people undertake when making choices that shape the spaces they inhabit If Christians think theologically about their agency in these decisions they will discover that architectural design becomes an opportunity to contribute to the flourishing for humanity and God s creation Edwards proposes an approach to architectural design that presents it as prophetic action with the power to shape our world This book then presents five moral commitments that guide design intentions and the process of design towards justice and inclusion Grounded in liberationist feminist and womanist thought Architecture Theology and Ethics makes a compelling case for architecture s relevance to Christian ethics and theology

Sweeney,2011-11-01 Though biblical theology has long been considered a strictly Christian enterprise Marvin A Sweeney here proposes a Jewish theology of the Hebrew Bible based on the importance of Tanak as the foundation of Judaism and organized around the major components Torah Nevi im Prophets and Kethuvim Writings Sweeney finds the structuring themes of Jewish life the constitution of the nation Israel in relation to God the disruption of that ideal documented by the Prophets and the reconstitution of the nation around the Second Temple in the Writings Throughout he is attentive to tensions within and among the texts and the dialogical character of Israel s sacred heritage Publisher description      *Light from the East* Alexei V. Nesteruk, In this unique volume a new and distinctive perspective on hotly debated issues in science and religion emerges from the unlikely ancient Eastern Orthodox Christian tradition Alexei Nesteruk reveals how the Orthodox tradition deeply rooted in Greek Patristic thought can contribute importantly in a way that the usual Western sources do not Orthodox thought he holds profoundly and helpfully relates the experience of God to our knowledge of the world His masterful historical introduction to the Orthodox traditions not only surveys key features of its theology but highlights its ontology of participation and communion From this Nesteruk derives Orthodoxy s unique approach to theological and scientific attribution Theology identifies the underlying principles logoi in scientific affirmations Nesteruk then applies this methodology to key issues in cosmology the presence of the divine in creation the theological meaning of models of creation the problem of time and the

validity of the anthropic principle especially as it relates to the emergence of humans and the Incarnation Nesteruk's unique synthesis is not a valorization of Eastern Orthodox thought so much as an influx of startlingly fresh ideas about the character of science itself and an affirmation of the ultimate religious and theological value of the whole scientific enterprise
