The Creative Conscience As Human Destiny:

The Creative Conscience as Human Destiny Eduard Hugo Strauch, 2004 The Creative Conscience as Human Destiny explains how human nature derived from our biogenetic evolution Whereas human ingenuity and self realization replicate nature s creativity its morphogenesis human conscience epitomizes the integration of organic life its symbiosis These mutual processes became incarnate as humanity s creative conscience Similarly the co evolution of man and woman has enabled us to create cultures and civilization From our intimation of a Supreme Being in nature human beings have also evolved a supraconscience By acknowledging the wisdom of nature we have a philosophy of life for the future The Supraconscience of Humanity Edward H. Strauch, 2010-05-25 Humankind evolved through three psychological stages subconsciousness conscience and supraconscience Ritual and myth cosmology and theism marked phases of psychic integration initiating our supraconscience evolution Four archetypes temperance the great chain of being Biblical interpretation and Divinity became the Cosmic consciousness of secular man Study of Scripture developed a communal supraconscience Mystics dedication showed us the deeper meaning of a life purpose Yet heretics taught man faith in the superior power of the free mind Heresy helped evolve humanity s secular supraconscience Indeed the exponential growth of psyche s powers and the continuous revelation of new secular knowledge seems the fulfillment of Revelation Finally the enlightened understood that when God created the earth he included evolution so that our kind would evolve a superior nature Hence religious and scientific secular and humanistic developments reveal themselves to be the primary powers accelerating human evolution Together they have nurtured humankind s ever evolving supraconscience Human Destiny John A.
