The Creative Elite In America:

The Creative Elite in America Nathaniel Weyl, 1966 Latinx Art Arlene Dávila, 2020-07-24 In Latinx Art Arlene Dávila draws on numerous interviews with artists, dealers and curators to explore the problem of visualizing Latinx art and artists. Providing an inside and critical look of the global contemporary art market, Dávila's book is at once an introduction to contemporary Latinx art and a call to decolonize the art worlds and practices that erase and whitewash Latinx artists. Dávila shows the importance of race, class and nationalism in shaping contemporary art markets while providing a path for scrutinizing art and culture institutions and for diversifying the art world.

Hollywood's America Stephen P Powers, 2018-02-19 American motion pictures still dominate the world market with an impact that is difficult to measure. Their role in American culture has been a powerful one since the 1930s and is a hallmark of our culture today. Though much has been written about the film industry, there has been very little systematic attention paid to the ideology of its creative elite. How does the outlook of that elite impact on the portrayals of America that appear on the screen? How do their views interact with the demands of the market and the structure of the industry to determine the product that is seen by mass audiences? Hollywood's America is a marvellously rich and careful discussion of these questions. It combines a meticulous systematic content analysis of fifty years of top grossing films with a history of the changing structure of the industry. To that mixture it adds an in-depth survey of Hollywood's creative elite, comparing them to other leadership groups. The result is a balanced discussion of unique breadth and depth on a subject of national importance. Placing the film industry in the context of American society as a whole, the authors point out that Hollywood's creative leadership impacts the larger society even as it is influenced by that society. The creators of films cannot remove themselves too far from the values of the audiences that they serve. However, the fact that films are made by a relatively small number of people who, as the authors demonstrate, tend to share a common outlook means that over time motion pictures have had an undeniable impact on the beliefs, lifestyles and action of Americans. This study contributes to the debate over the role and influence of those who create and distribute the products of mass culture in the United States. The book also contains a devastating critique of the poststructuralist theories that currently dominate academic film criticism, demonstrating how they fail in their attempt to explain the political significance of motion pictures.

British Models of Art Collecting and the American Response Dr Inge Reist, 2014-10-28 This collection of fourteen essays by distinguished art and cultural historians examines points of similarity and difference in British and American art collecting. Half the essays examine the trends that dominated the British art collecting scene of the nineteenth century. Others focus on American collectors using biographical sketches and case studies to demonstrate how collectors in the United States embellished the British model to develop their own, often philanthropic approach to art collecting.

Things American Jeffrey Trask, 2011-11-29 American art museums of the Gilded Age were established as civic institutions intended to provide civilizing influences to an urban public, but the parochial worldview of

their founders limited their democratic potential. Instead, critics have derided nineteenth century museums as temples of spiritual uplift far removed from the daily experiences and concerns of common people. But in the early twentieth century a new generation of cultural leaders revolutionized ideas about art institutions by insisting that their collections and galleries serve the general public. *Things American: Art Museums and Civic Culture in the Progressive Era* tells the story of the civic reformers and arts professionals who brought museums from the realm of exclusivity into the progressive fold of libraries, schools, and settlement houses. Jeffrey Trask's history focuses on New York's Metropolitan Museum of Art, which stood at the center of this movement to preserve artifacts from the American past for social change and Americanization. Metropolitan trustee Robert de Forest and pioneering museum professional Henry Watson Kent influenced a wide network of fellow reformers and cultural institutions. Drawing on the teachings of John Dewey and close study of museum developments in Germany and Great Britain, they expanded audiences, changed access policies, and broadened the scope of what museums collect and display. They believed that tasteful urban and domestic environments contributed to good citizenship and recognized the economic advantages of improving American industrial production through design education. Trask follows the influence of these people and ideas through the 1920s and 1930s as the Met opened its innovative American Wing while simultaneously promoting modern industrial art. *Things American* is not only the first critical history of the Metropolitan Museum. The book also places museums in the context of the cultural politics of the progressive movement, illustrating the limits of progressive ideas of democratic reform as well as the boldness of vision about cultural capital promoted by museums and other cultural institutions.

Art in the Encounter of Nations Bert Winther-Tamaki, 2001-01-01 *Art in the Encounter of Nations* is the first book-length study of interactions between the Japanese and American art worlds in the early postwar years. It brings to light a rich exchange of opinions and debates regarding the relationship between the art of the two nations. The author begins with an examination of the Japanese margins of American Abstract Expressionism. Taking a contrapuntal approach, he investigates four abstract painters: two Japanese artists who moved to the United States, Okada Kenzo and Hasegawa Saburo, and two European Americans whose work is often associated with Japanese calligraphy, Mark Tobey and Franz Kline. He then looks at the work of two young scions of the calligraphy and pottery worlds of Japan, Morita Shiryo and Yagi Kazuo, and argues that their radical innovations in these ancient arts were in part provoked by their sense of a threat posed by Euro-American modernity. The final chapter is devoted to the career of Japanese American sculptor and designer Isamu Noguchi, whose feeling of affiliation was directed to both the U.S. and Japan in shifting ratios through a series of public and private places, each posing unique opportunities for exploring national distinctions.

American Angels Peter Gardella, 2007 Explores the rich history of angels in America from Spanish colonialism and Puritan culture to modern incarnations found on TV, in movies, in comic books, and on bumper stickers. Finds that Americans have constructed the useful angel as a servant of man rather than an agent of God.
