Wars with China and Japan in Western Newsmagazines Damien Ng, 2022-02-27 This book explores China's currency wars with its trading partners in four Western newsmagazines: Time, The Economist, L'Express, and Der Spiegel. Based on both quantitative and qualitative approaches, the interdisciplinary approach adopted in the research draws on two analytical frameworks from the realm of critical discourse analysis: van Leeuwen's socio-semantic inventory of social actor representation and van Dijk's concepts of macro rules as the overarching approaches to understand the changing dynamics of international relations and the global economy through Western media. The sample in this study consists of 160 texts, half of which are focused on China and the other half on Japan, across a period of 12 months in 2010 (China) and in 1987 (Japan). Through the comparison of Western representation between China and Japan, the similarities and differences in their coverage have been revealed, as even more striking with regards to global politics and the international economy. The findings obtained from the empirical research have revealed that China was not only reported more unfavourably than Japan in terms of depth but also across a broader range of areas spanning economics, politics, and military affairs. It has also emerged that all the four Western newsmagazines tended to centre their coverage on the US and China in 2010 and the US and Japan in 1987, although they did not speak in one collective voice with regard to their coverage of China and Japan.

Chinese Currency, Coin and Paper Money W. Vissering, 1877 **China's Fintech Explosion** Sara Hsu, Jianjun Li, 2020-08-04 Financial technology or fintech is gaining in popularity globally as a way of making financial services more efficient and accessible. In rapidly developing China, fintech is taking off, catering to markets that state-owned banks and an undersized financial sector do not serve, amid a backdrop of growing consumption and a large tech-savvy millennial generation. It is becoming increasingly likely that some of China's fintech firms will change the way the world does business. In *China's Fintech Explosion*, Sara Hsu and Jianjun Li explore the transformative potential of China's financial technology industry, describing the risks and rewards for participants as well as the impact on consumers. They cover fintech's many subsectors such as digital payment systems, peer-to-peer lending, and crowdfunding, credit card issuance, internet banks, blockchain finance, and virtual currencies, and online insurance. The book highlights the disruption of traditional banking as well as the risks of fintech and regulatory technology. Hsu and Li describe major companies including Alipay and Tencent, developer of WeChat Pay, and a wealth management business, and other leading fintech firms such as Creditease, Zhong An Insurance, and JD Finance. Offering expert analysis of market potential, risks, and competition, as well as case studies of firms and consumer behavior, *China's Fintech Explosion* is a must-read for anyone interested in one of the world's breakout sectors.
